Liberal Democrats' Vision of Japan: Us or Chaos NATO Will Use Jets

By David E. Sanger

New York Times Service

NAGOYA, Japan — Prime Minister Kiichi Miyazawa has a vision of what Japan may look like after Sunday's elections. Should the oppo-sition win, he tells crowds on a campaign tour across the country, the Japanese should brace themselves to slide into Third World chaos.

If the Social Democratic Party, which opposes nuclear power, joins in forming a new government, he warned the other day, "it is clear that we will have hours of blackouts everyday like in the Philippines." Japan has been pouring in foreign aid to keep the lights on

Michio Watanabe, a former foreign minister and a leader of the governing Liberal Demo-

crats, says Mr. Miyazawa is wrong. Japan, he said recently at a rally near Tokyo, will look more like Italy.

The cabinet will be changing all the time. the economy will be in disarray, the number of thieves and beggars will increase, and so will robberies and rapes." he said.

"I have never heard of a country that pros-pers with the political situation in chaos," he

These are desperate days for the Liberal Democratic Party. So, in a last-ditch effort to stem a hemorrhage of support, its leaders are running what amounts to a campaign of lear. After 38 years as the party of ever-increasing prosperity — new bullet trains, high-tech office parks, full employment — the party's officials

are racing across the country this week warning that Japanese voters risk destroying all that

Mr. Miyazawa is having a difficult time getting his message across because many candidates have asked him, as politely and indirectly as possible, to stay out of their districts. No one wants to be tarred with the prime minister's failure to pass a political reform bill or with his single-digit popularity ratings.

But in a country with an electorate as conservative as Japan's, the message of imminent ruin is enormously forceful. It plays particularly well in the countryside, where local fortunes have traditionally depended on the Liberal Democrats' largess with public-works projects. In recent days, newspaper polls have shown a

modest swing back to the governing party. Some analysts say that the party may now be able to retain the 222 seats it was left with in the House of Representatives after a fifth of the membership defected last month, leading to a vote of no confidence. According to polls published Wednesday, the Liberal Democrats could win nearly 230 seats.

That would not be enough to command a majority in the 512-seat chamber. But it would make the party the leading member of any coalition government, able to freeze out the rebel forces if they could lure about 25 indepen-dents or members of minor parties into an alliance of convenience.

Mr. Miyazawa's strategy, in evidence when See JAPAN, Page 7

In Bosnia to Protect **PeacekeepingForce**

By Joseph Fitchett nal Herald Tribune

PARIS - The NATO alliance ratcheted up its involvement in Bosnia on Wednesday with a decision to use ground-attack aircraft to protect United Nations peacekeepers -and in practice the Muslim enclaves - against attacks by Ser-

bian and Croatian forces.
U.S., French, British and Dutch attack planes were reported to be converging on air bases in Italy in preparation to start flying the new mission, probably next week, according to officials who disclosed the NATO ambassadors' approval of the plan at their weekly meet-

Allied officials said that the careful planning of this new NATO peacekeeping operation—
approved by all the allies, including France—
should produce a smoother operation than the
intervention in Somalia and thus provide a
model of NATO's capabilities for the future.

No public confirmation was forthcoming from the headquarters of the North Atlantic Treaty Organization, where officials want to let the political initiative come from the United Nations Security Council, but the official UN

request is thought to be only a formality.

The fresh Western military commitment comes late in the sense that Serbs and Croats appear to be close to crushing the Muslim-run Bosnian government's forces.

But Western governments hope that the escalation will preserve the remaining Muslim en-claves and provide some negotiating leverage if the Muslims decide to seek a political settlement now.

That prompted NATO governments to proceed with implementation of a UN resolution in May, setting up safe-haven areas and authorizing the use of air power against ground targets in Bosnia.

The NATO plan will involve about 60 warplanes, mainly low-flying U.S. A-10 Warthogs designed to knock out tanks and artillery. They will be protected by strike aircraft, including French and British Jaguar fighters and Dutch

F-16s.
Technically, the warplanes are supposed to go into action only to protect UN peacekeepers. In practice, the UN units, mainly French and British, are located mostly in the safe havens. which constitute the nucleus of a Muslim rump state if Bosnia is partitioned.

eager to get this protection and ready to work with NATO. UN flag. Those commanders are said to be

The allied air campaign will operate under the command of a U.S. admiral who is the top

NATO officer in the Mediterranean. France, departing from its usual reticence about seeing NATO expand its role, joined the new mission because its ground forces—nearly 4,000 of the roughly 9,000 peacekeepers in

former Yugoslavia — are in danger as the Bosnian lighting moves to a climax. NATO officials are hopeful that air power will work more smoothly in support of ground troops in Bosnia than it has in Somalia, where other governments have complained about poor coordination between the attack helicopters and warplanes, which are mainly U.S., and infantry from Pakistan. Italy and other country of the country from Pakistan.

tries taking part in the UN operation there.

"The difference is that Somalia involves a coalition of the willing and the new action in Bosnia is the work of a functioning alliance." according to an official at NATO.

In more general terms, NATO's preparations for the expanded air campaign in Bosnia where the alliance has been keeping Serbian aircraft out of the skies since April —have been made with an eve to demonstrating the alliance's ability to function effectively as a mili-

UN Command in Somalia Strained After U.S. Raid

By Keith B. Richburg

Washington Post Secure International support for the United Nations military intervention in Somalia showed further signs of strain Wednesday amid recriminations over a U.S. gunship assault against a Somali warlord's stronghold that provoked a riot in

which four foreign journalists were killed. The raid also left as many as 54 Somalis dead, the International Committee of the Red

Pamphlets in Somali and English appeared on Mogadishu streets from a group calling itself Muslim Voice, warning: "We are going to launch an attack to the American compounds." The pamphlets called on "all Muslim countries in the world to kill Americans in their coun-

In London, six British police officers were injured and nine people were arrested Wednesday when violence erupted outside the U.S. Embassy during a demonstration against military attacks in Somalia, Reuters reported. A police spokeswoman said the officers were

treated for minor injuries.] Mogadishu was reported to be tense, and aid workers said that they believed a threat of attacks against foreigners was high.

Italy said Wednesday that the Somalia campaign had turned away from its original humanitarian objective into "urban guerrilla operations," and it said Rome would seek to move its contingent out of the capital unless an agreement was reached with the UN on a new

An Italian statement called for the suspension of UN combat operations and a review of the multinational mission

[In New York, Koffi Annan, the UN undersecretary-general for peacekeeping efforts, said Italian forces in Mogadishu would be redereported.

Mr. Annan refused to describe the transfer of

General Bruno Loi as dismissal, saying that he preferred to think of it as "rotation." Mr. Annan said the 2,600-member Italian force would be redeployed on the advice of the UN leadership in Somalia.]
Since UN offensive operations began in So-

malia last month, Italy and the United States have clashed over the shape and character of the mission, with the Italians favoring more negotiation and dialogue with the Somali war-lord, General Mohammed Farrah Aidid.

The Americans, in private, accuse the Italians of "insubordination" for running, in essence, a separate line of policy and refusing to follow UN directives.

Italy asserts that the United Nations operation in Somalia has too many Americans in high policy positions. The Italians have demanded a greater say in military planning -

something the U.S. has rejected. After the U.S. helicopter gunship attack on fonday, the Italian press and the Vatican

By Douglas Farah Washington Post Service

MANAGUA - Explosions that ripped through a car repair shop on the outskirts of Managua at dawn May 23 sent shock waves far beyond Nicaragua. From the debris have emerged a guerrilla arsenal threatening the Salvadoran peace process, documents detailing a Marxist kidnapping ring directed against Latin American millionaires, and hundreds of false passports and identity papers.

The three blasts that tore through the Santa Rosa neighborhood killed two people, damaged 16 houses and exposed a sophisticated bunker including 19 surface-to-air missiles. The underground vault also held the passports, falsified identity papers and documents

laid to the kidnapping ring.
Investigators and diplomats said there was strong circumstantial evidence that the arsenal and the ring operated with at least the tacit approval of Nicaragua's leftist Sandinista National Liberation Front, which held power from 1979 until 1990 and whose leaders still control the army and state intelligence.

In Washington, the State Department ex-pressed "very deep concern" Wednesday over the discovery of the arms cache and the pres-

ence of an international terrorist operation in Nicaragua. The Associated Press reported.] The vault "looked like a one-stop shopping center for terrorist activities, where you could get guns and documents," said a diplomat (a-miliar with the case. "You would have to be extraordinarily naive to think this was not under the aegis of some part of the intelligence

operation of the Sandinistas." Because some fraudulently obtained Nicara-

guan passports were discovered in March at the home of a suspect arrested in New York in connection with the Feb. 26 bombing of the World Trade Center, U.S. investigators have also visited here twice to see if any links exist

U.S. Embassy spokesman said he could not comment on the continuing investigation. U.S. authorities found five Nicaraguan pass-

ports, five Nicaraguan birth certificates and two driver's licenses when they arrested Ibraham Elgabrowny in Brooklyn in early March. The passports contain photographs of Sayyid A. Nosair, his wife and children, Mr. Nosair is in prison in New York, convicted of a weapons charge after being acquitted of the 1990 murder

Mafia Finds Bugs in Its Favorite Dishes

By Selwyn Raab New York Times Service

NEW YORK -- Forget about the legal and sociological reasons offered for the decline of America's Mafia. Credit is due to crackdowns by the FBI and other investigators, but the underlying cause of the mob's deterioration is more simple — gangsters talk too freely and

eat too prodigiously.

Gastronomy is a defining force in the collective persona of the mob, and undercover agents and informers are exploiting the Cosa Mostra's eating habits. Omertà - the code of falence - seemingly vanishes when mobsters gather at table.

After a decade of futilely investigating Paul Castellano, the late boss of bosses, the FBI

finally got the goods on him by planting a bug. They concealed it in the kitchen of his Staten Island mansion, the White House. While Castellano and his henchmen in the Gambino family are and imbibed, they also uncorked a cornucopia of incriminating secrets for the FBI's eavesdroppers in the

Omertà has become obsolete as turncoats, to save their own necks, stream into the Federal Witness Protection Program and testily against their confederates. There is rarely a Mafia trial these days without a good measure of testimony emanating from a pasta sitdown or a cannoli klatsch

Books by and about canaries have become an industry. Often the most riveting scenes are culinary. A recent one is "Joe Dogs: The Life and Crimes of a Mobster" by Joseph lannuzzi, a "wannabee" who never rose above the rank of "soldier" in the Gambino family. In his quest for membership, Mr. lannuzzi dabbled in narcotics, burglaries, frauds, loan sharking and bookmaking and served as a slugger (enforcer) before becoming an FBI informer.

But based on his U.S. Army K.P. experience, a brief stint as an apprentice chef and some talent, Mr. Iannuzzi was quickly accepted as a gourmet among gangsters. Many scenes of mayhem, deals and cornage in his career revolved around restaurants and pri-

BLOWING FRANCE'S HORN — A trumpet player, mouthpiece at his lips, before the July 14 parade on the Champs-Elysées in Paris on Wednesday.

Thatcher's Plea For Plebiscite Loses, 445-176

LONDON - Former Prime Minister Margaret Thatcher broke openly Wednesday with the Conservative Party government she headed for more than 11 years, leading a revolt in the House of Lords over ratification of the Treaty on European Union,

Despite Lady Thatcher's stinging criticism of the treaty and her first vote in defiance of the party's leadership in her 34 years in politics, the revolt fell short, moving Britain one step closer to completing what has been a tortuous journey towards ratification.

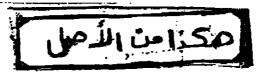

By a vote of 445 to 176, the Lords rejected a contentiously debated but largely symbolic measure backed by Mrs. Thatcher requiring a public referendum on the treaty, which calls for greater economic, diplomatic and military coordination within the European Community.

The House of Commons already had overwhelmingly rejected a similar measure, and would almost certainly have overturned a vote in favor by the Lords. The treaty is supported by the government and both major opposition parties and is opposed primarily by rebel Tories, led in spirit by Lady Thatcher, in both houses of Parliament.

Despite the larger-than-expected margin of victory for the government, the day made clear that Mrs. Thatcher remains a potent and restless force in British politics, and one who if nothing else is exceedingly irksome to her successor, Prime Minister John Major.

The treaty still faces a test in the Commons this month, over whether Britain will accept EC rules on working conditions. Britain is the only country not to have completed ratification except Germany, where a court challenge to the

Bosnian Refugees Wander the Globe Seeking Asylum

By David B. Ottaway

Washington Post Service KUTINA, Croatia - Nihad Beslagic, a Muslim, and Ivica Tomic, a Croat, did not know they had a lot in common before they started playing chess together at a refugee camp here.

Now they know they share an equally grim past, a bleak present and a very uncertain future.

Both men are victims of "ethnic cleansing" at the hands of their Serbian neighbors - driven from their homes in northern Bosnia, stripped of their property. extorted for "exit visas" and forced into exile from their homeland, possibly forever.

Now, day after day at this refugee village 45 miles east of Zagreb, the Croatian capital, Mr. Beslagic and Mr. Tomic play chess together and ponder what will happen to them and to people like them — the real pawns in the endgame of the Bosnian tragedy.

They seem to be certain of only one thing. "I know there is no chance for us to return to the land I come from," said Tomic, 38, a miner from

Sanski Most west of Banja Luka, "There will be no

cease-fire ever in my home area. Down the road, in the same settlement, Ante Komuskic, another "cleansed" Croat from northern Bos-

nia, agreed.
"There can be no more fair, tales about democracy or help from the West," he said. "I'm a foreigner now

The civil wars fought over the carcass of former Yugoslavia these past two years have given rise to a massive diaspora of more than a million Muslim and Cross refugees — the largest case of "forced migration" in Europe since the population displacements caused by World War II.

About a quarter of Bosnia's prewar population of 4.3 million has fled that land, spreading out across the world from Pakistan to the United States, from South Africa to Finland, in search of new homes, jobs and

direction for their shattered lives.

The neighboring countries of Croatia and Serbia have had to absorb a massive influx of more than 500,000 refugees from the Bosnian battlefields.

But more than 670,000 victims of the Yugoslav wars -- the vast majority of them casualties of "ethnic cleansing" in Bosnia -- have found refuge in Western Europe, which is gripped by ethnic tensions, serious unemployment, too many African and East European workers, housing shortages and social welfare

Most of these refugees went to Germany. Austria and Switzerland before their borders began closing through such restrictive measures as visas, work permits, residence permits and letters of guarantee.

Some of the Muslims from Bosnia are emigrating to Islamic countries like Jordan, which has agreed to take 500, and Pakistan, which has offered haven to 10,000.

Most UN refugee officials would agree with Mr. Tomic's assessment that the vast majority of the refugees are unlikely to return to their homes, or even to

And many refugee officials say the Bosnians may form the most volatile element, and the most serious long-term challenge, in what has become a massive wave of immigrants, asylum-seekers and economic migrants from Eastern Europe. Asia and Africa to the countries of Western Europe.

Many analysts are drawing parallels between the plight of the Bosnian Muslims and that of the

and keep it handy for next time.

Telefon

Sadako Ogata, the UN refugee commissioner, arriving Wednesday in Sarajevo for an inspection tour. She called for more money.

One frequently asked question is whether Bosnian Muslim extremists will turn to seeking revenge on their enemies through terrorism, much as some embittered Palestinian factions have done ever since the

foundation of Israel in 1948. Ejup Ganic, vice president of the Muslim-led Bosnian government, has issued the first public warning. ing that the huge mass of homeless Bosnian Mus lims forming inside the European Community could become a breeding ground for terrorists.

This is particularly likely, he said, if there is a

widespread feeling among Bosnian refugees of betrayal by European nations that refused to arm or help their country.

"If the international community decided to finish with us, of course terrorism will start all over Europe."

It is probably too early to judge the lasting impact of the influx of Bosnian refugees into Western Europe. But already it is clear that this group of immigrants will be exceptional.

'These are not normal immigrants," said Alessandra Morelli, an official in Karlovac of the UN High Commissioner for Refugees. "They didn't choose to go abroad. They were forced to."

The Bosnians not only were forced to emigrate but. in many cases, also did so with nothing but the clothes they were. Thousands have begun a new life as charity

Their single biggest problem, Miss Morelli said, is Like the Palestinians, who lost their homes when the growing reluctance of economically strapped Eu-

Croatia is struggling to cope with 271,000 Bostian refugees, in addition to 254,000 displaced Croatians from the 22 percent of Croatia held by Serbs in the

"In terms of the percentage of our total population, it's as if the United States had to accept 30 million Mexican refugees." said Josip Esterajher, spokesman for the Croatian government's Office for Displaced Persons and Refugees.

The cost to the Croatian government for housing feeding and caring for these people will be \$746 million this were according to million this year, according to Mr. Esterajher. The entire government budget is around \$1 billion.

The government has been giving each displaced Bosnian Croat — although not Bosnian Muslims — a supend of about \$12 plus \$5 for pocket money each

Tensions between the huge Muslim refugee popula-on—at least 70 percent of the total—and Croatians have increased, partly because of the recent eruption of warfare in central and southwestern Bosnia beween Croats and Muslims, erstwhile allies against the

there would be no change in Croatia's policy.
"Croatia is the only European country whose bor

ders are still open," he said. The closure of Europe to the continuing tide of Bosnian war victims has left Croatia, a front-line state take in thousands of Bosnian Croat refugees — with no questions asked - and that as of late June, there has been only one case of Bosnian Muslims being

deported to Bosnia. UN officials intervened to stop it. Still, Croatia clearly has a double policy toward Bosnian refugees, one for Croats and another for Muslims, Muslims can enter Croatia only with a transit visa for passage to a third country, and do not benefit from government subsidies.

Croats, on the other hand, are treated almost like full-fledged Croatian citizens and can get passports relatively easily.

But the plight of Muslim and Croatian refugees seems remarkably similar in the telling. Take, for instance, the two cases of Mr. Beslagic and Mr. Tomic, Both have found the same accommodations in the

Kutina resettlement camp, a prefab village with new paved roads and fresh landscaping that houses 1,400 people in 105 specially insulated homes.

But nobody is helping either Mr. Beslagic, a butcher by trade, or Mr. Tomic, a miner, to get work permits, a

WORLD BRIEFS

Mexico to Repatriate China Refugees

MEXICO CITY (AFP) - Mexico agreed Wednesday to receive and repatriate at least 659 Chinese emigrants stranded in international waters off its Pacific coast, officials said.

Deputy Foreign Minister Andres Rozental said the move was based on humanitarian concerns, but added that the Chinese would be repatriated immediately, the boats would be seized and their crews put on trial for

The three ships were intercepted July 6 by the U.S. Ceast Guard off Baja California, Mexico. The Chinese were believed sailing for the United States as part of a smuggling operation.

Cambodia May Accept Khmer Rouge

PHNOM PENH (AP) - A Cambodian leader indicated on Wednes day that the government was prepared to risk losing foreign aid by accepting a deal offered by the Khmer Ronge to end the civil war.

"Most important now is that Cambodia should reunite," said Hun Sen, co-chairman of the interim government. "It should not allow foreign commits to use their economic influence to divide Cambodia."

The Khmer Danta leader Khime Samphan "Moral Tanaday to time.

The Kinner Rouge leader, Khieu Samphan, offered Tuesday to turn over command of the group's 10,000-strong guerrilla force and the 20 percent of Cambodia that it controls if his group was given a position of percent of Cambodia that it controls it his group was given a position of permanent adviser to the newly elected government. The United States has vowed to withhold aid if the Khmer Rouge is given a role in the government. Prince Norodom Shanouk, the Cambodian head of state, said in a statement Wednesday that Cambodian leaders would meet with the Khmer Rouge in September to discuss its proposal.

Kim Philby's Long Grim Good-Bye

MOSCOW (AP) — Kim Philby, the British-born Soviet spy who died at 76 in Moscow in 1988, spent the last 18 years of his life as a recluse, distilusioned with communism, troubled by drink, unwanted even by the KGB, his Russian widow said Wednesday in her first public appearance.

The woman, Rufina Pukhova, is writing a book about her 18-year marriage to Mr. Philby and answered questions from journalists at the offices of the newspaper Literaturnaya Gazeta to promote the book. She said Mr. Philby never expressed regret for his spying, or homesickness for England. But he felt discarded by the KGB, whose officers viewed him as a suspicious foreigner. He rarely left the apartment, she said, and listened to the BBC radio news each morning over a cup of tea, then read British newspapers, watched sports on television and did crossword puzzles.

Mr. Philby was one of history's most successful double agents. For two decades, from the mid-1930s to the mid-1950s, he passed British and American secrets to Moscow while working at the top level of MI6, the British intelligence service.

U.S.-North Korea Progress Cited

GENEVA (Reuters) - The United States and North Korea reported unspecified progress Wednesday in negotiations to open two suspected nuclear sites in North Korea to international inspection.

After meeting for seven hours, officials from the two countries said that the talks had been "useful" and that they would meet again on Friday.

U.S. officials had said in advance that the talks would only resume on Friday if progress was made.

"The two sides agreed that the discussions we had today were produc-tive and useful," said the North Korean first vice minister of foreign affairs, Kang Sok Ju, after had net with a U.S. assistant secretary of state, Robert Gallucci. The talks, held at the U.S. mission in Geneva, followed an earlier round in New York in June. Those talks led to North Korea suspending its threat to withdraw from the Nuclear Nonproliferation

Russian Troops Retake a Tajik Post

DUSHANBE, Tajikistan (Combined Dispatches) — Russian troops recaptured a border post in Tajikistan on Wednesday after a fierce fight with Muslim guerrilles infiltrating from Afghanistan officials and news

The battle was so intense that the Russian defense minister, Pavel S. Grachev, said Russia should reinforce the frontier immediately with more troops, tanks, artillery, fighting vehicles, attack planes and possibly bombers.

Post No. 12 near the village of Sangor was attacked from the Afghan side of the fromtier Tuesday in what officials called one of the bloodiest cross-border attacks in recent months. When Russian and Tajik forces backed by aircraft and artillery retook the post, they found 20 of their comrades dead, said Major General Anatoli Chichilin, commander of Russian border troops in Tajikistan.

400 Race Crimes in May in Germany

BONN (Reuters) — Germany registered 400 ethnic crimes in Maya including injury to 96 people and the death of five in attacks by extremes rightists, the government said Wednesday.

In answer to a question in parliament, it said the attacks included 33 cases of arson, 59 beatings and 308 offenses such as property damage.

threats, insults and theft.

Sixty-six people have been detained and six charged. The May figures included arson that killed two Turkish women and three children in the western city of Solingen. The police registered 141 extremist crimes in January and February. There were more than 500 in September.

Health Industry Pours Funds Into Congress

WASHINGTON - President Bill Clinton's health-care plan has not even made it to Capitol Hill and already the health and insurance industries have increased their political action committee donations by 20 percent, giving \$2.2 million in the first five months of 1993, most of it to key health-committee members.

An analysis of Federal Election Commission records by the consumer group Citizen Action shows overall PAC giving rose by 8 percent from the similar period in 1991. Citizen Action favors a single-payer, Canadian-style health system;
Hospitals, health-maintenance organizations and nursing homes

increased their contributions at the fastest rate — 49 percent followed by doctors and other health-care professionals, at 31

Members of the Finance Committee in the Senate, and the Ways and Means, and Energy and Commerce panels in the House received nearly half of all the health and insurance industries' PAC money. The 20 members of the Senate Finance Committee averaged \$11,912. Those benefiting the most were the chairman of the Senate Finance Committee, Daniel Patrick Moynihan, Democrat of New York, who received \$70,500, and the leader of the Democratic majority in the House, Richard A. Gephardt of Missouri, who

High Court Nominee Gets Highest ABA Rating

received \$50,000.

in I multing

WASHINGTON - The American Bar Association has given Judge Ruth Bader Ginsburg its highest rating on her fitness to be a Supreme Court justice, congressional officials said.

The rating of "well qualified" underlined the vastly changed

political context in which Judge Ginsburg will face the Senate Judiciary Committee next Tuesday for her confirmation hearings. compared with that of the last Supreme Court nominee, Clarence

In 1991, the ABA's Standing Committee on the Judiciary gave Thomas a mixed rating, a majority giving him the middle grade of "qualified" and a minority deeming him "not qualified." The rating was conveyed on Tuesday to the Senate Judiciary Committee and to

Judge Ginsburg, who was nominated to the court by Mr. Clinton on June 14, is expected to encounter no serious opposition to confirmation. She has served on the U.S. Circuit Court of Appeals for the District of Columbia for 13 years, earning a reputation as a cautious iurist.

Justice Thomas received the lowest rating ever given by the bar association to someone who was confirmed for the court.

The justice nominated before Justice Thomas, David C. Souter, received a unanimous "well qualified" rating from the bar associa-

During the 12 years of Republican rule in the White House, the bar association's role in judicial nominations was heatedly debated in legal circles. Many Republicans complained that the bar associa-tion was tilted toward liberal judicial candidates. (NYT)

Bush Subpoensed Over Arms Sales to Iraq

WASHINGTON - Former President George Bush was served with a subpoena to appear as a witness in September at the trial of an Atlanta banker who is accused of making nearly \$5 billion in

unauthorized loans to finance Iraq's arms buildup.

The lawyer for Christopher P. Drogoul, the banker, said Mr. Bush's testimony and documents he may possess were needed to demonstrate the main point of his client's defense—that Mr. Drogoul was carrying out the Bush administration's policy of filting toward Iraq in its war with Iran and of trying to woo President Saddam Hussein with American arms and dollars. (NYT)

Clinton Names European Community Envoy

WASHINGTON - Mr. Clinton has named Stuart Eizenstat, a former aide to president Jimmy Carter, as the next U.S. ambassador

to the European Community, the White House said.

Mr. Eizenstat, whose appointment must be confirmed by the Senate, currently heads the Washington office of a law firm based in Atlanta.

From 1977 to 1981: Mr. Eizenstat, 50, was Mr. Carter's main-demostric realistic advisors. Ballong that he senated on the White House.

domestic policy adviser. Before that, he served on the White House staff of president Lyndon B. Johnson, also a Democrat. Stuart Eizenstat has been an important, and highly respected

voice in national and international policy debate for many years." the White House statement said.

Rift Divides Abortion Proponents in Congress

WASHINGTON -A growing number of female lawmakers are reconsidering their support for the most far-reaching abortion rights fore Congress this session, exposing a widening schism within the ranks of those who call themselves "pro-choice" and

further clouding the prospects for the bill.
"It is very serious," said Representative Maxine Waters, Democrat of California, adding that the widening disagreement, which has taken on racial overtones, marks "the first time that I have witnessed this kind of division in the women's movement around this issue.

Supporters of the bill, which is known as the Freedom of Choice

Act, say they seek to write into law the Supreme Court's landmark 1973 Roe v. Wade decision establishing abortion as a constitutional right, which would take the issue out of the hands of the courts. The legislation is running into difficulties because its supporters

The registation is running into difficulties occause its supporters cannot agree over how sweeping it should be.

The outlook for the bill is particularly questionable in the House. Don Edwards, Democrat of California, chairman of the House Judiciary Committee subcommittee that wrote the bill, said supporters were counting their votes every two or three days, and had yet to come up with a majority.
"We're rather close," he said, "but we're not there yet. I won't kid

The dispute among abortion rights advocates centers on provisions in the bill that give states the option of deciding whether to pay for poor women's abortions and whether to require parental involvement before a minor can get an abortion. Polls show that while most Americans believe a woman has a right to an abortion, it should not be paid for by taxpayers, and that minors, in most cases, should not receive abortions without the knowledge of their parents. Aspin Said to Back a 'Don't Ask, Don't Tell' Gay Policy

By Eric Schmitt

New York Times Service WASHINGTON - Defense Secretary Les Aspin will recommend to President Bill Clinton that homosexuals be allowed to serve in the military as long as they do not make public or private declarations of their sexual orientation, gay-rights advo-cates said Pentagon officials have told

Mr. Aspin's decision as reported by the advocates would put the secretary behind one of the more conservative proposals offered in the debate over homosexuals in the military.

cy, but that would mean overruling his defense secretary as well as many members of the Joint Chiefs of Staff, who also support a "don't ask, don't tell" approach. By describing a policy clearly unpalat-

able to the gay-rights advocates, the Pentagon seemed to ensure that the proposal would land in public debate before Mr. Clinton makes a decision later this week. The advocates who met with the Penta-

gon on Tuesday. Thomas F. Sheridan and Chai Feldblum of the Campaign for Military Service, said they had to justify the move as an effort to meet the concerns of the top brass, which they said must be done to make any progress at all.

striction, could come up with another poli-

tary policy would be rewritten to say that gree. Mr. Clinton's promise to end bias in "homosexual conduct," not simply "homosexuality," was incompatible with military service, as the current policy reads.

If the policy emerges as described by the gay-rights leaders, it would resemble the stricter versions of "don't ask, don't tell" proposals supported by Senator Sam Nunn, Democrat of Georgia, who heads the Senate Armed Services Committee, and many of the Joint Chiefs.

The Joint Chiefs' and the Pentagon's position was presented solidly," said Mr. Sheridan, "They told us. 'It's this position or the president can decide for himself if he wants to go down in flames."

DES MOINES, Iowa - President Bill Clinton visited the floodravaged Midwest on Wednesday and promised to send legislation to Congress immediately for a minimum of \$2.48 billion in federal di-

saster relief.
"I have seen whole towns flooded, but I have never seen any-thing on this scale before," Mr. Clinton said after his helicopter passed over inundated fields, railroad bridges and the contaminated water works near the lowa capital city. Streets below him disappeared into tracks of muddy water.

"It's very bad," Mr. Clinton said.
"This is a very profound problem." Following his helicopter tour, he answered questions on a radio program. "The spirit of the people seemed undannted," he said, al-though he noted that several people had "choked up" as they contemplated the extent of the destruction.

Mr. Clinton praised the U.S. relief effort under way and urged Congress to "move in a speedy way" to approve the aid measure. Leading Republicans signaled their agreement, and Mr. Clinton said that the relief total was certain to be increased as additional damage estimates were compiled.

After his helicopter tour, Mr. Clinton went to a water distribution center and talked with people waiting in line with plastic jugs to shake hands with the president.

"Hang in there," Mr. Clinton told many of those in line. "God bless you, Mr. President," said one caller during his radio ap-

Impact on Economy Likely to Be Minor

By Louis Uchitelle New York Times Service

NEW YORK --- For all the spectacular devastation of the Mississippi flood of 1993, the impact on the huge U.S. economy is likely to be very small, many experts say.

While the flood has threatened to interrupt shipments of food, chemicals, cars and other products, nearly every obstacle has so lar been overcome or bypassed.

When the floods washed away a railroad bridge across the Missis-sippi at East Hardin, Missouri, cutting the Santa Fe's main line from Chicago to southern California, trains were rerouted along another railroad's tracks to cross the river below Saint Louis. When the water covered the tracked used by the Monsanto Chemical Co. to ship herbicides from its plant in Muscatine, Iowa, the herbicide went by truck for two days, while new ties Powell Given Saudi Medal and track were laid on top of the old ones, bringing the rail line once

Off Course in Somalia

What started as a humanitarian United Nations mission to feed starving Somalis seems to be turning into something far less benign. The United Nations says 15 people were killed in Monday's raid by U.S. helicopter gunships and ground troops against the headquarters of Mohammed Farrah Aidid; the Red Cross counts 54 dead. The bodies of four journalists have also been recovered, apparently victims of mob retaliation. Whatever the final death count, enough is enough. Italy now rightly asks that offensive actions be suspended while the international community reassesses its goals. The Security Council needs to ask what purpose the UN military operation is serving, and whether it is worth the heavy price in lives and goodwill.

The original UN objective in Somalia was noble: providing food to millions of starving people isolated by civil war and anarchy. UN agencies and a too small contingent of Paki-stani peacekeepers proved unable to carry out that assignment, so Secretary-General Butros
Butros Ghali appealed for outside help.
George Bush responded, dispatching some
30,000 U.S. troops on a short-term mission to reopen the supply routes. The Americans quickly did that, and in less than five months handed command back to the United Nations, although some 4,000 U.S. soldiers remain, with additional reinforcements close by.

In a place as anarchic as Somalia, humanitarian and security objectives must go together. But it is a mistake to see security in purely military terms. The United States, as the world's strongest military power, can temporarily strike fear into local warlords, but not even American might could manage that for very long without getting bogged down in messy combat.

The United Nations has neither the military cans nor the political will to light a prolonged war against entrenched warlords like General Aidid; and it should not be gunning down his supporters, however misplaced their loyalty. There is a better alternative. The United Nations can limit itself to securing relief operations and maintain a more scrupulons neutrality in Somalia's ongoing civil war.

It had started to follow that course, with some success, under the leadership of its former special representative, Mohammed Sahnoun. But Mr. Sahnoun made the mistake of publicly tangling with the UN bu-reaucracy and was abruptly removed from his job last fall. Now the United Nations must get back to basics. Somalia is a humanitarian mission. The United Nations is a peace organization. It should not be gunning down Somalis from helicopters, no matter what warlord they support.

- THE NEW YORK TIMES.

Killed Doing Their Job

foreign correspondents tend make their work look easy. No matter how terrifying the situation, the job at hand is to impose order on events. Writers are supposed to produce clear prose. Television correspondents need to sound authoritative and in control. Photographers, along with television camera and sound crews, may have the most dangerous jobs of all, since they must always be right where the action is, up close and in the line of fire. They

are not supposed to flinch or duck for cover. Because news from dangerous places has become such a commonplace, we often forget the courage it takes to find it until we are reminded by horrible events such as Monday's slayings of four journalists in Somalia. The dead were Dan Eldon, a 22-year-old photographer for Reuters who held dual American and British citizenship; Hosea Maina, 38, also a Reuter photographer, and Anthony Macharia, a 22-year-old sound man for Reuters television service, both from Kenya; and

Hansi Krauss, 30, an Associated Press photographer from Germany.

Their deaths were not accidental. They, along with several other wounded correspondents, were victims of mob violence directed specifically at foreign journalists. Unarmed journalists became convenient targets for angry Somalis retaliating for attacks by UN troops on a command center of warlord Mohammed Farrah Aidid. "They are trying to bring a bit of light into some very dark corners [of] the world," said David Hannay, the British president of the United Nations Security Council, "and it is a tragedy that they suffer from this."

War correspondents know the dangers they court, yet it is hard to accept that one of those risks can involve death at the hands of the very people whose suffering they are trying to bring to the world's attention. We honor Messrs. Eldon, Maina, Macharia and Krauss for their commitment to reporting about the violence in Somalia that ultimately took their lives.

- THE WASHINGTON POST.

It's Akin to Barbaric

Most Americans now know better than to use nasty generalizations about ethnic or religious groups. Disparaging stereotypes — the avaricious Jew, the sneaky Chinese, the dumb Irishman, the lazy black - are so unacceptable that it is a shock even to hear them mentioned. Thanks to current international politics, however, one form of ethnic bigotry retains an aura of respectability in the United States: prejudice against Arabs. Anyone who doubts this has only to listen to the lyrics in a song from the animated Disney extravaganza "Aladdin":

Oh, I come from a land,

From a faraway place, Where the caravan camels roam Where they cut off your ear If they don't like your face. It's barbaric, but hey, it's home. Understandably, Arab-Americans are up-set. They find it difficult enough that Saddam Hussein is the villain du jour and that terrorists from Arab countries have recently threatened New York. The difficulties mount when policemen in Iran imprison women for showing their hair, or when mullahs issue death warrants against authors they consider blas-phemous. But the ayatollahs of Iran do not represent all Arabs, nor all Muslims — just as sleazy televangelists do not represent all Christians, or all Americans.

Bowing to pressure from the American-Arab Anti-Discrimination Committee, the Walt Disney Company has agreed to change two lines - the ones about cutting off ears in the home video version of the movie, which will come out in October. The line "It's bar-

baric, but hey, it's home" will remain. That is progress, but still unacceptable. To characterize an entire region with this sort of tongue-in-cheek bigotry, especially in a movie aimed at children, borders on barbaric. - THE NEW YORK TIMES.

Other Comment

The 'New Boy' Fares Well

President Bill Clinton has gotten his sea legs in international diplomacy. He started as the "new boy on the block" at the economic summit meeting in Tokyo. But Mr. Clinton is a quick study, and he found that there is a lot of deference that goes with being the presi-

dent of the United States.

He had three achievements during his Asia trip: the decision of the global treaty negotiators to reduce or eliminate tariffs on 18 manufactured goods; Japan's concessions on talks leading to more open Japanese markets; and his summit partners' decision, influenced by his jawboning, to kick in \$3 billion in aid for Russia in its drive toward democracy and free-market reforms. In all three, Mr. Clinton emphasized the impact in terms of American jobs and jump-starting its sluggish economy.

Mr. Clinton repeatedly noted that for the

first time the leaders of the world's other rich nations should not not lecture America about its deficit, because he was trying "to put our house in order."

So the president got some triumphs under his belt; but he returns home to a host of problems. --- Helen Thomas of UPI.

Dealing With a Defiant Iraq

The UN Security Council's orders were clear and emphatic. Iraq, after its defeat in the Gulf War, was required to destroy its stocks of ballistic missiles and chemical and biological

weapons, and its facilities to build nuclear weapons. The council also ordered a longterm international monitoring program.

The Iraqi regime has always resisted the monitoring plan. Resistance has now become defiance. Last week a UN team left Baghdad in frustration after seeking for more than a month to get Iraq to permit surveillance cameras to be set up at two former missile test sites. The Security Council had already warned of "serious consequences" if Iraq refused to allow the cameras.

If Iraq's government has learned anything in the last few years it should be that defiance of the United Nations is not cost-free. Earlier this year, Iraq threatened to interfere with UN inspection flights over the country. In response, a factory in Baghdad linked to the nuclear weapons program became the target for U.S. Tomahawk cruise missiles Jan. 17. And late last month an intelligence complex in the capital was attacked by U.S. missiles, in response to evidence of official Iraqi involvement in a plot to kill former President George Bush.

Washington's view is that no new Security Council authorization is needed for any further military strikes. Certainly, though, Mr. Clinton should work hard to enlist other countries in any new military mission, reminding his colleagues that the confrontation is not just between the United States and Iraq, as Baghdad would have it, but Iraq and the United Nations. That's "Nations," plural, a point the president should take care to empha

Will No Leader Rise to Meet the Balkan Challenge?

By William Pfaff

VIENNA — The Yugoslav novelist Miroslav Karaulac has said of the people of Bosnia that they "acquired the fatal habit of living together, a quality which the various armies now lighting one another are, by means of a bloodbath, attempting to correct." The correction is nearly complete, extermination near for the idea of a liberal politics in Yugoslavia, and for those who believed in it.

The collective presidency of "Muslim" Bosnia — consisting of three Serbs, three Croats and four Muslims now is divided between the realism of despair and capitulation, and that desperate optimism that can be sought in history — "a continuing story of the unexpected," as the Bostian pres-ident, Alija Izetbegovic, has said to

vibrant and open than they had expected. But virtually no top Chinese leader has heard the views of his U.S.

counterpart argued forcefully and directly.

They are not themselves a deterrent to those borders' violation, nor does any deterrent exist. Washington and the European capitals explicitly have made it their policy not to intervene in Yugoslavia — who can reasonably expect them to change that policy now? Nonetheless, one or more of the Western governments might have learned from this terrible experience. and could change. Here we arrive at what can be done now, if anyone has the prescience and courage to act. It still is possible to stop the spread of ethnic and national war in the Bal-kans and in South Central Europe, where the existence of Albanian, Hungarian, Greek and Turkish national minorities in neighboring countries is a permaneut source of tension and invitation to war.

First the situation and security of those minorities must be addressed so as to deal with their legitimate anxieties about their own safety and cultural integrity, while addressing the equally legitimate fears of the governments under which they live that these minorities represent a potential threat to their sovereignty and

this, if we will use them. The Conference on Security and Cooperation in Enrope exists in order to protect hu-man rights, and it produced extraordinary results during the years of communism's decline and collapse. The states of the region are CSCE members (as are the United States and Canada) and have accepted CSCE ob-ligations, which involve international

those borders in any systematic way.

territorial integrity.

We have the mechanisms to do

observation and guarantees.

The Council of Europe exists to assure "the principles of the rule of law and of the enjoyment by all jurisdiction of human rights and fundamental freedoms." Since the Yugoslav crisis began there has been an attempt by several European states to provide a new institution of juridical guarantees and adjudica-

tion in contested rights cases. At the same time we can establish a military barrier to further acts of aggression. This is eminently within NATO's capability. The need is urgent to redefine NATO's mission so as to deal with the threat to European security that exists right now. If not, we will lose NATO - otherwise an irrelevant survivor of a Cold War now finished - at a moment when European security is more seriously jeopardized than at any time since the 1950s. I have written before in this column (as I have in the current issue of Foreign Affairs quarterly) about the need for a NATO guarantee of existing European frontiers against non-negotiated change.

But we have to act. We have today the possibility of an energetic two-track program — diplomatic and military - to halt new ethnic war in the Balkans. Can't some government, somewhere in the West, take the initiative? What about the Netherlands, or Sweden, or Italy, if France or Brit-ain won't act? Why not France? There is a new and intelligent government in Paris that owes nothing to the appeasement policies of its So-

comfort to have been right.
Will no leader take action to spare

modern Europe still another tragedy?

Imbalance Awaiting Correction

By Gregory Clark

T OKYO — Asking Japan to rein in its ballooning trade surpluses is like asking the sun to stop rising. The surpluses are built in, for a variety of reasons.

One is superior productivity. Past Japanese protectionism combines with a post-feudal work ethic (not unlike what once existed in the North European societies) and heavy reinvestment of profits to give Japan an unbeatable lead in most manufacturing industries.

Collectivist instincts — the firm must survive — are a further bonus. Where the United States has three major car makers, Japan, with a much smaller market, has five majors and almost as many minors. The European Community and the United States together have only five or six major electrical and electronic goods makers. Japan is saturated -

10 majors and even more minors.
This "overcompetition," or kato
kyoso, as it is called in Japan, leads to the relentless push to expand over-seas, matched by equally ruthless ac-tion against rivals, Japanese or for-

eign, entering domestic markets.
The high savings level — a result of relatively low class-consciousness in a society where the workplace is the main basis for identity — is a further factor. It has the triple effect of reducing imports, increasing export pressure and providing cheap funds

to Japanese industry.

Superimposed on all this is the inefficient tax, bureaucratic and finan-cial system, which prevents the mobilizing of high savings and trade surpluses for badly needed public works — which would stimulate do-mestic demand and increase imports.

Far down on the list comes the perpetual Western, and now Clinton, complaint that Japan's markets are

A 20 percent yen appreciation to, say, 80 to the dollar would solve a lot of problems.

closed. Sometimes they are closed and sometimes they are remarkably open. Japanese women make it quite clear that they prefer Western fashion goods. Men have an equally faddish preference for Scotch whisky, U.S. golf clubs and Canadian log houses. Some of the barriers that do exist could be overcome if Westerners tried harder to master the language and culture. By one calcula-tion, if all Japanese markets were open, Japan's trade surplus would drop by 10 percent. If all Western markets were open, Japan's trade surplus would increase by 15 percent.

That said. Japan's surpluses do create an intolerable burden for the West. Happy talk about Japan recyes. or using it to fill the gap in Western savings levels, is meaning-less. So is the attempt to blame the cumulative U.S. fiscal deficit. (Japan's is larger.)

Japanese arguments that the West should not worry because hundreds of thousands of Westerners are employed distributing and selling Japanese products are worse than meaningless. The trade surpluses must be reduced, and quickly. One way is for Japan to be forced to produce : abroad the goods that it now so readily seeks to export. But that will take time. What is needed now is a 🧦 massive appreciation of the yen.

The Japanese argue that in terms of purchasing parity the yen is al-ready overvalued. They are partly right. Present exchange rates may make housing, hamburgers and haircuts in Japan much more expensive . than in the rest of the world.

But that is Japan's fault. Cultural and historical factors have long . combined to create the gap between high productivity in manufacturing and abysmal productivity in the service, food and construction sectors. Toyota makes cars in Japan with almost twice U.S. productivity, but sells and rents cars in Japan with less than half U.S. productivity. For decades, Japan has been happy

to enjoy the protectionist fruits of this imbalance. Now it should be forced to endure the pain. A 20 per- . cent appreciation for the yen to, say, 80 to the dollar would solve a lot of problems. Japanese manufacturing would suffer greatly. Some firms might even have to face the collectivist unthinkable — go bankrupt or amalgamate. But if that is a price that ? Japan has to pay, so be it. The Western economies have suffered enough.

When the Economy Holds **More Threat Than Promise**

By E. J. Dionne Jr.

WASHINGTON — The Tokyo economic summit amounted to a group visit to the political intensive care unit. Among the leaders of the world's richest democracies, President Bill Clinton was by far the most popular, a com-ment not on the love he has aroused among the American people but on the terrible mess politicians find themselves in throughout the industrial world.

The easiest explanation for the troubles facing the world's politicians is that we just don't make leaders like we used to. Maybe that is how historians will look at the matter, but it is generally bad policy to judge contemporary leaders by the standards of past giants. For most of his time as president, Har.y Truman, so lionized today, was seen as a burn. Who knows how Bill Clinton or his new friends from Tokyo will look in 40 years?

A more plausible explanation for the troubles of incumbents focuses on the end of the Cold War. Like it or not, the Cold War endowed the world's democratic politicians with a heroic purpose;

Bargains between people & and their communities, firms and governments have been shattered.

hacks and statesmen alike had a chance of standing on the right side of history and opposing the Soviet monolith. There is something to this, but most of the time, politicians rise and fall on the basis of how the folks at home feel.

The real problem these politicians face is that local and national politics have now become irretrievably global because their economies are locked into the global system. Every politician, and that includes Bill Clinton, has less and less control over his or her domestic economy. That is because the people who run companies and invest money have an expanding array of choices about where to move their plants and their dollars, Deutsche marks and yen.

It is thus harder than ever for national politicians to broker deals inside their borders to spread the wealth around through social insurance programs, national wage policies or guaranteed bene-fits like vacations, health care and parental leave. If a country is too generous to its work force, it can become less "competitive" and its plants and jobs will go elsewhere. The nightmare for politicians is that they are held responsible for their national economies but have fewer ways of affecting the economy's direction. Responsibility without power can be as corrupting as power

The global economy is not without its virtues and, as the product of techno-

logical revolutions, cannot simply be abolished. But for very large numbers of people, the global economy is more menace than promise for the foreseeable future. The new economy shatters the social and personal bargains that people thought they had with their companies, their communities, their governments.

This sense of betrayal came through clearly in a useful study of Ross Perot's voters released by the Democratic Leadership Council while Mr. Clinton was doing his star turn in Tokyo. The study, conducted by Stanley Greenberg, Mr. Clinton's poll-taker, found that Perot supporters were not, as is commonly assumed, mainly worried about the deficit. They were concerned most of all about the overall state of the economy and its failure to reward "the middle class" and "people who work hard for a living." They trust neither big business nor big government. They assume that politicians must be corrupt and government incompetent, given the precarious

circumstances of so many.

Al From and Will Marshall, the Democratic Leadership Council's majordo-mos, used the study to argue for their group's agenda, including a less expensive, less bureaucratic government and the imperative that Mr. Clinton emphasize "mainstream values" such as "work. family and individual responsibility. These are perfectly sensible conclusions but the perceptions of governmental failure and moral crisis that Mr. From and Mr. Marshall want Mr. Clinton to address are inextricably tied to the dis-

ruptions created by the global economy. Two questions are paramount: Since no one government can succeed in spur-ring world growth, how can govern-ments coordinate their efforts to that end? And how can governments cooper-ate to contain the disruptions created by the global economy so that the many who now fear that their standards of living will decline regain a measure of mic security and the wherewithal to find their footing under the new economic rules?

Supporters of a purely free-market approach recoil at these questions, preferring to see the market gain the upper hand on governments. This view is ulti-mately shortsighted. It's easy in the abstract to hail capitalism's capacity for "creative destruction." But those whose standards of living get "creatively de-stroyed" will not sit by patiently while governments do nothing. In the worst of circumstances, they will lose faith in both democracy and market economics. Better that democratic governments figure out how to tame the global economy in the interest of saving it and creating popular support for an open and expansive world trading system. The Tokyo summit was only a small step in this direction, but it was a start.

AND THEDE WAS ANOTHER ONE WHERE THIS WEIRDO KEPT MARKYING THESE GIRLS. KILLING THEM AND STASHING THEIR BODIES ALLOVER THE CASTLE!

LETTERS TO THE EDITOR

To Bring Semites Together

Regarding "The Semitic Potential" (Letters, July 14) by Paul Kollek: I agree with Mr. Kollek that his vision

of a true partnership of all the Semitic peoples of the world is Utopian. But by coincidence I read his remarks while attending the colloquium of the International Council of Christians and Jews in Haifa, Israel. This had as its theme, "Sharing the Blessing of Abraham in the Holy Land Today.

The colloquium was attended by Jews, Christians and Muslims from many lands, including Lebanon. It was a great success, and a ray of light in an area where the emphasis is so often on

hatred, rivalry and war. I bope that people of all faiths will join Mr. Kollek in his prayers for bringing together all Semitic peoples.

SIR SIGMUND STERNBERG. International Council of Christians and Jews. London

Timidity Is Not Prudence

It is clear that the guiding principle in Europe today is the short-term political survival of small-minded governments possessed of little courage. Bosnia, it is true, was always a doubtful proposition as a country. But if Munich taught noth-ing else, it should have taught that pas-sivity in the face of evil quickly creates the need for painful activity in the face of greater evil; that in Europe local conflicts have extended consequences.

We have learned nothing. What is

being created in Bosnia, and would less embarrassingly have been created under the Vance-Owen plan, is a ritualized regional instability. The original ten-sions in the region run so deep and are so complex and intractable that Germany's headlong recognition of Bosnia was certain to fan the embers of conflict. The cynical hope that this would burn itself out quickly, and with a minimum of embarrassment, has been in vain. Instead, now, overlaid on historical antag-

flicts of future generations. An American administration, obsessed with polls rather than principles, led by a president ambiguous about mil-itary service, has signaled its intention to withdraw from the leadership responsibilities which his nation's position requires. If it is true that governments are not what happens, that they are the result of what happens in their societies - then in that truth lies the deepest

onisms, are new horrors to fuel the con-

worry about America today. Timid statesmanship is not prudent statesmanship; it is bad policy and, in the long term, bad politics, too.

JOHN W. WOOD.

The Truth About the Bekaa

Regarding "Clinton Owes America the Truth about Syria" (Opinion, June 16): A. M. Rosenthal's claim that 90 percent of Lebanon's Bekaa Valley is given over to drug cultivation, based on the report of a U.S. House subcommittee, is the kind of journalism that makes the Middle East such a mystery for Westerners. I spent two weeks in Lebanon in

April looking for drugs in the Bekaa Valley, as part of research for an opcoming book, and was never able to find any. Surely drugs are grown there, but the figure of 90 percent is insane.

MICHAEL BOND. Fontainebleau, France.

Drugs have been cultivated in the Bekaa Valley for generations, as any traveler can easily see. I remember the local parliamentary deputy proudly claiming ownership of a vast poppy field when taking a visiting foreign dignitary on a tour of his considerable holdings.

This was in the early 60s, long before Syrian troops were stationed in the Be-

taa Valley. The Lebanese government did not then appear to be greatly per-

turbed by the lucrative drug industry.

From a report carried by a Saudi daily newspaper I gather that Syrian and Leb anese forces again raided drug growers' fields last month. Does Mr. Rosenthal not find cause to claim credit?

OTTO SCHNITTGER. St. Augustin, Germany.

Tit for Tat in the Baltics

Regarding "Estonia Suspends Anti-Russian Law" (June 28):

I found this front-page dispatch most surprising in that it failed to mention why Estonia's anti-Russian law was suspended - Russia had cut off Estonia's gas supplies. It looks like Russia has a good bit of control over its past subjects. and that is worth noting.

PETER B. MARTIN. Montcuq, France.

For Green Revolutionaries, A Latin American Triumph

By Richard Critchfield

L BATAN, Mexico — Human ingenuity keeps disproving doomsayers.

Thomas Malthus's 1798 "Essay on the Principle of Population" changed histo-Principle of Population" changed history, not because of its message that population would outstrip food supplies. Rather, it revolutionized human behavior by making contraception acceptable. so that we got sex without consequences.

But books like Paul Ehrlich's "Population Bomb" in 1968 and the Club of Rome's 1972 study "The Limits of Growth" keep Malthusianism alive. Lester Brown of Washington's World-

MEANWHILE

watch Institute keeps dusting off his old idea that the world's farmers have already pushed the limits on land, seeds. irrigation and chemical inputs.

The Green Revolution, we keep hearing is losing momentum. And sometimes it looks that way, with drought in Africa and Europe, famine in Somalia, one crisis after another in India, 17 or 18 civil wars in Africa. Last year grain output fell by about 60 percent in Zambia, Malawi and Zimbabwe. Farming failed in parts of the former Soviet Union.

So are we running out of food? World production did not increase at all in 1992. Yet the prospect in the coming decade is not of famine but of glut.

The biggest breakthrough on the horizon is coming on Latin America's vast cerrado, the seemingly endless grassy plains centered in Brazil. The cerrado covers more than 200 million hectares (500 million acres) — more than all the cultivated land that feeds India's more than 800 million people. Until 20 years ago, this savannah had such acid soils it was considered worthless for farming.

Lime could be applied, but if a week or 10 days went by without rain, roots died and plants collapsed. Only in the last few years have scientists been able to breed new varieties of corn, wheat and soy-beans, highly tolerant to aluminum in acid soils, along with minimum tillage techniques and drought-resistant crops.

Suddenly, 12 million hectares of cerrado are producing a fourth of Brazil's rice, corn and soybeans, a fifth of its coffee, and 15 percent of its beans. This is just the beginning. Scientists at CIMMYT, the internationally funded

agricultural research center here, say that, depending on world prices, the availability of fertilizer and food de-mand plus investment in irrigation, the cerrado could easily feed Brazil's 152 million people. More important, say environmental-

ists, farming the cerrado probably means saving the Amazon basin and what is left of its tropical rain forests. The link between productive agriculture and saving the environment is not

always easily understood. Ever since Ra-

chel Carson's "Silent Spring," scientific

already taken part.

the address opposite.

colleges all over the world.

ples who use most chemical fertilizer. The average farmer in Africa uses just 4 kilos, x; per hectare; that compares to 433 kilos in 77 Germany, 358 in Britain, 260 in Chius -1

and 93 in the United States.

Meanwhile, breakthroughs in scientification and one recently invented hybrid cotton; and one both Chinese and Indian scientists are discontinuous and one of the cotton racing to come up with hybrid wheat.

But the cerrado's potential dwarfs in even these advances. "It could be the breadbasket of all South America," says Sanjaya Rajaram, a CIMMYT wheat 317

scientist, "with wheat as a main crop." I'm.
The best analogy is probably the rapid fit settling of America's Great Plains, once John Deere's steel plow and Cyrus Mc-70 Cormick's reaper were invented in the 31 1830s. The comparable breakthrough in 32 the cerrado's case is not just machinery in but new techniques of disease-resistant in breeding, chemical soil treatment, use of JR

organic matter and no-till farming. 10
The impact, when it comes to saving 12. the environment, could be the same. In =1 America, land was saved for recreation, 30 wildlife habitat and forestry because sci- ur ence made farming so productive. For the example, in 1940 the United States pro-induced 252 million tons of the 17 most important food, feed and fiber crops. By 1980, on only 3 percent more land, it produced 610 million tons.

Machinery and modern chemistry and biology have made this possible. If Americans had been forced to produce ... the 1980 harvest with 1940 farm technology, it would have required 177 million in

more hectares of equal quality land.

Take another example. The United Parameter of 1776 was entirely wooded. A squirrel could have started in a treetop in Maine and crossed to the Gulf Coast, tree to tree, without touching ground. This is land, the most fertile in the country, was cleared and farmed. But without the steady application of science, the destruction of American forests, grasslands and grazing lands to feed the nation's people 3 would have been enormous.

It looks like this story will be repeated 37 in South America. Dr. Rajaram, regarded % by many as the world's top wheat scientist, says that "if Brazil fully develops the ... cerrado it won't have to touch the Ama- 41 zon Basin." That is good news for all. International Herald Tribune.

Swiss Seize Italian Fugitive in Scandals

Compiled by Our Staff From Dispatches GENEVA — Giuseppe Garolano, a lormer chairman of the Montedison chemicals group and a key figure sought in Italy's investigation into nationwide corruption, has been arrested in Switzerland and may be extradited, officials A magistrate, Pierre Marquis, said Mr. Garo-

fano, who was also a top executive at Ferruzzi Finanzaria SpA, which holds a controlling stake in the Montedison food and chemical group, was apprehended in Geneva "He was arrested last night," Mr. Marquis said in response to a telephone inquiry, adding that he did not know the exact charges. "We are waiting for the Swiss police's federal arrest

warrant," he said.

The Italian authorities, who issued an arrest warrant for Mr. Garofano in February, have requested his extradition. Mr. Marquis said. However, he added that the prosecutor's office would have to talk first with Mr. Garofano and his lawyers before deciding whether to comply.

Mr. Garofano was chairman of Montedis

in connection with a donation of 250 million lire (5158,000) to the Christian Democrats, the largest party in the four-party governing coali-

Milan magistrates allege he used company funds to make the payment. Mr. Garofano admits he gave money to the Christian Democrats, but he insists that it was a payment from

If Montedison funds were used for the payments, magistrates would have grounds to start an investigation into false accounting.

Mr. Garofano, 48, has been a fugitive since February. Italian dailies said last week that he was secretly negotiating to return to Italy. Montedison, which is in a crisis over the Ferruzzi group's 31 trillion lire debts, is waiting for five Italian banks and two foreign banks to

assemble a restructuring plan,
A total of 151 members of the Italian parliament - 15.7 percent of the total - have been warned that they are under investigation in the corruption scandal, ANSA, the news agency, said Wednesday. until he resigned in January to become a consultant for the group. He is wanted by Italians

WWF World Wide Fund For Nature

Outside the industrialised west, no-one has to be told to respect their elders. It's simply the way society is organised.

Which is why WWF - World Wide Fund for Nature tries to work with older people in the villages of the rainforests. With WWF's help, they learn to teach the younger members of their communities about conservation.

In Kafue Flats, Zambia, it's Chief Hamusonde (93). Chief Bakary (78), is our man in Anjavimihavanana, northern Madagascar.

This isn't just expediency, it's how WWF believes conservation projects should be run.

Before you teach someone, we believe you have to learn from them.

We spend years visiting village after village, talking to the people, listening to them, living with them, understanding how they live their lives.

Once they realise we're on their side, our elderly converts promote conservation with a zeal that belies their years.

"Uncle" Prom (68), another of our Thai community leaders, tells us that he frequently gets scolded when he starts telling people in the market that they should leave the forests alone.

But he gets results.

Uncle Prom and his fellow villagers recently managed to prevent a new logging concession, and set up a community forest where tree felling is now forbidden. Not that we don't believe

in catching them while they're young.

WWF also runs training courses to help teachers incorporate conservation into the

HE'S JUST ABOUT OLD ENOUGH FOR OUR TEACHER TRAINING PROGRAMME.

New Bloc Defended By Walesa

The Associated Press WARSAW - President Lech Walesa defended his new "nonpar-ty" bloc Wednesday as the best way to keep former Communists

from coming to power in the coming legislative elections. Mr. Walesa, speaking at a news conference, expressed annoyance at negative press coverage of his speech on state television Tuesday night, in which he asked Poles to support his new "Nonparty Bloc

for Reforms." Newspapers said on Wednesday that Mr. Walesa was using his office to promote a new political party. But the president said that if he stood apart from politics. Poland would be headed for disaster in the

Sept. 19 elections. Today if we had elections without my involvement, I know who could win - Kwasniewski with Miller as No. 1," said Mr. Walesa, referring to leaders of the Social Democracy of the Republic of Poland, the former Communist party.
He predicted that the United

Peasants' Party, which was once

allied with the Communists, would

finish second, followed by the prochange Democratic Union and the

center-right Confederation for an Independent Poland. Forming a government with those results would be almost impossible, Mr. Walesa said.

EUROPEAN TOPICS

In Europe, They're Working Hard Over the Issue of a Day of Rest Battle lines are being drawn over Sunday store

openings in at least three European countries.

In France, the Virgin Megastore, which is a big and highly profitable music retailer on the Champs-Elysées in Paris, has been waging a guerrilla war against a low that bans most sunday work must nutherized by the local profest. When a new not authorized by the local prefect. When a new prefect recently refused to renew Virgin's one-year special exemption, the store defiantly remained open from Saturday morning to midnight Sunday, serving free coffee and croissants to early morning

Small-shop owners in the Marais district have been fighting their own battle. After receiving hundreds of Sunday citations, some have tried bold ruses: When labor inspectors come by, vendors claim to be related to the shop owner, which allows them to work; or shoe sellers pose as clients

and suddenly start trying on shoes. Two British groups may join forces in a bid to defeat the liberalization of Sunday laws. The Keep Sunday Special association, which has considerable support in the House of Commons, and Re-tailers for Shops Act Reform, which includes the big Marks & Spencer chain, want only small shops

l garden centers to open Sundays. And in Bavaria, Catholic groups are opposing a Sunday-opening movement; they say such a change would break with 3,000 years of Judeo-Christian tradition.

Around Europe

The number of American tourists visiting Europe is expected to be up this year by 500,000, to 7.5 million, says the European Travel Commiss Largely because of the relative strength of the dollar. American visitors will pay 35 percent less in Italian restaurants this year than last; and hotel accommodations in Britain will cost 25 percent

Finland hopes a rise in tourism can help improve a steadily darkening economic scene. Finnish ex-ports to the Soviet Union once accounted for 27 percent of the total; but sales to the Soviet successor republics are dismally low, accounting for only 3 percent. Unemployment is now at 20 percent; housing prices are tumbling; stores are going out of business. Fewer and fewer Finns, reports Die Zeit of Hamburg, can afford foreign travel, a new car, or a restaurant visit. "The situation is not just dark," says a Labor Ministry official, "It is pitch black." But Finns seem to be keeping their cool. There is no talk of social breakdown in the Finnish welfare state, says Matti Klemola, editor of Helsingin Sanomat. And the country's suicide rate, tradi-tionally high, has not gone up.

Long taboo in Norway, TV commercials are econing as unavoidable as the country's coastal ainfall. After years of debate, the government in 1990 licensed Norway's first no-pay commercial channel, TV2. Part of the aim was to help domestic manufacturers maintain an edge against loreignproduct advertisers, whose messages, beamed in by satellite, were increasingly invading Norwegian airwaves. The law still forbids TV advertisers to target children directly, and as a result TV2 has no specifically childrens' programming. Concern about television's influence on children is perhaps not surprising in a country where playgrounds are found on nearly every corner and disper-changing rooms are common in banks.

Dracula comes home to Romania this weekend as the latest film version of Bram Stoker's novel opens in Bucharest and 14 other cities. Much to-do is being made of the return of the world's most famous vampure, loosely based on a 15th century member of Transylvania's landed gentry, Vlad "The impaler" Tepes. The Stoker novel has been reissued, a book of medieval Dracula legends has been published, and a distillery, Transylvania Ltd., now offers a "Dracula Spirit" vodka which, of course, is blood red.

Brian Knowlton

He got in the way of somebody's war.

Nine out of ten casualties in modern warfare are civilians.

The vast majority of its victims never wore a uniform or carried a gun.

In the so-called "post-war" period since 1945, at least 20 million people have died in over 100 conflicts. A further 60 million have been wounded, imprisoned, separated from their families and forced to flee their homes or their countries.

In over 30 armed conflicts, this human misery is happening now.

Yet the Geneva Conventions

— ratified by 164 states — lay
down clear rules that all victims
of war living under the darkness
of conflict must be respected.

They have the right to protection from murder, torture, starvation and being taken hostage.

To focus attention on the plight of millions of civilians caught in the crossfire, the International Red Cross and Red Crescent Movement is launching a worldwide campaign to ensure that they get the protection and assistance to which they are entitled under international law.

No matter who. No matter where. No matter when.

We call on governments and combatants everywhere to respect the rights of all victims who get in the way of somebody's war.

Iraq Acts to Save **Industry From Raid**

By Paul Lewis

New York Times Service BAGHDAD — In anticipation of renewed American and allied air strikes, President Saddam Hussein is seeking to protect strategic Iraqi industries and key government installations by removing irreplaceable machinery, records and equip-ment and hiding it in safe places, according to foreign diplomats and

This wholesale dismantling of potential industrial and governmental targets appears to have begun in earnest in June, the sources say, before President Bill Clinton ordered a cruise missile attack against an Iraqi intelligence center in Baghdad.

But it has accelerated since then, particularly in the military-industrial sector, with factories being stripped of whatever machinery can easily be removed and their

workers sent away indefinitely. Offices in the rebuilt presidential palace here have also been evacuat-ed. And in some cases, government officials have been ordered to take

Secretary 1

files to their homes for safekeeping. Iraqis here say the foreign intelligence service headquarters that the United States attacked on June 27, with the loss of six civilian lives, was one of the government sites that had already been evacuated in the belief that it might be targeted again as it had been during the Gulf War.

This effort to protect Iraqi's key industrial and governmental cen-ters from another bombing attack is being organized by President Hussein's son-in-law, Hussein Kamei Hassan, who oversees the

country's military industries. And it is taking place just as Iraq finds itself at another standoff with the United Nations Security Council over plans for monitoring two missile testing sites to ensure it does not develop forbidden weap-

Rolf Ekeus, the head of the special commission overseeing the elimination of Iraq's weapons of mass destruction, is expected in-Baghdad on Thursday for talks with the Iraqis about their refusal itary industries.

to let his weapons inspectors install surveillance video cameras at these sites or seal equipment there to prevent its use.

Under the Security Council's Gulf War cease-fire terms, Iraq is required to give up its weapons of mass destruction and its industries are to be subjected to long term monitoring by the special commission to make sure that Mr. Saddain does not try to rebuild such weap-

The Security Council has warned Iraq that it faces "serious consequences" if it continues to prevent the inspectors from carrying this

Both Mr. Chuton and the U.S. secretary of state. Warren M. Christopher, have hinted of possible new military action.

On Tuesday, Britain's United Nations representative, Sir David Hannay, who is this month's Security Council president, told Iraq it was "playing with fire."

According to a recent U.S. congressional study. Iraq has succeeded in rebuilding about 80 percent of its military industry which was heavily bombed during the Gulf

In a recent interview, the Iraqi minister of industry and mineral resources. Amer Saadi, asserted that 90 percent of civilian industry, which was also attacked during the war, was operational again, although a shortage of raw materials due to the trade embargo against Iraq has left most factories working at 10 to 50 percent of capacity.

The assumption among diplomats in Baghdad is that Iraq still wants a negotiated settlement to the dispute over monitoring of the missile testing sites, particularly since the Security Council has made it clear that until the dispute is resolved, Baghdad can forget about its request for a partial lifting of the oil embargo so it can buy more food and medicine.

But it is not clear whether this will be possible since Iraq is effectively challenging the special com-mission's right to carry out the long-term monitoring of Iraq's mil-

Skipped over the fact that officials on both sides said no negotiating had taken place at the sushi bar.

PROMISED LAND — Several of about 250 Yemenite Jews who have come secretly to Israel over the past year, sitting Wednesday in front of an immigration office in Rehovot. Only 900 Jews remain in Yemen. Almost all the Jews of Yemen, about 45,000, came to Israel in the 1950s.

OMERTA: Silence Golden No More at Mafia Tables

Continued from Page 1

vate repasts he prepared for the hierarchies of the Gambino and Colombo families.

This fall, the author will serve up "The Mafia Cookbook." It is a collection of what he says are the favorite staples of his former dining companions. Mr. Iannuzzi, who was given the nickname Joe Dogs because of his penchant for greyhound racing, pre-sents 37 recipes: Monkfish Marinelli to celebrate a successful burglary; Pasta Fagioli and Veal Osso Buco to welcome a new soldier: Mandarin Pork Roast to honor an acting boss, and Orecchietti with Peas and Prosciutto in honor of a double murder.

"Mafia Handbook" is by Douglas LeVien Jr., a New York Police undercover agent, and Juliet Papa, a reporter. They provide a guide to the Cosa Nostra's preferred restaurants and recipes, such as Scampi à la Tommy Russo, named for a detective who used the dish to infiltrate the mob, and Penne Tommaso Buscetta, a pasta delicacy in recognition of a major

Cholesterol consciousness apparently is not on the mob's menu. Many of Mr. Jannuzzi's offerings seem like killers, Shrimp Scampi Gambino Style calls for three-quarters of a pound of butter and an egg yolk. Fish en Papillote in Bechamel Sauce requires five

tablespoons of butter and three cups of milk. For mobsters recognition at restaurants is a vital status symbol. Many Mafia climbers open restaurants

dent Bill Clinton. For decades, the or muscle their way into established ones to obtain the trappings of dignity and influence. A restaurant can also provide the cover of a legiti- than the restaurant's maitre d'.

Mr. LeVien and Mr. lannuzzi capitalized on this over-consumption. In their undercover lives, while wearing concealed bugs, they frequently obtained incriminating evidence at restaurants.

The restaurant peril is an occupational hazard that has long been ignored by even the willest of bosses. Dine they must despite the list of casualties. Joey Gallo was gunned down in 1972 celebrating his birthday at Umberto's Clam House in Little Italy. Carmine Galante, the dreaded Bonnano family boss, was assassinated in 1979 dining alfresco at Joe and Mary's Restaurant in Bushwick. And in 1985, Paul Castellano was ambushed at the entrance to Sparks Steak House on East 46th Street.

For reporters who cover organized crime, reconnoitering the dining spots of New York's Cosa Nostra families is a necessity. The landscape ranges over all boroughs: the Plaza Pizza in New Dorp, Staten Island; Amici's in the Belmont section of the Bronx; Russo's Howard Beach, Queens; Abbracciamento on the ier in Carnesie, and Giambone's, near the Criminal Court building in lower Manhattan, a lunchtime retreat for Mafiosi as well as judges and prosecutors.

The bond between New York's traditional mobsters and restaurants was illuminated by the slaying of Galante in 1979. At the time, members and associates of the Bonanno and Gambino families delighted in the veal rollatini and chicken cacciatore at the Lanza's Restaurant on First Avenue near 10th Street. Services for Galante were conducted at a funeral home a few steps from Lanza's and the mortician was none other

Exercise Helps Protect Bones, but Not Alone body, and can help increase bone density bodywide.

By Jane E. Brody

EW YORK — Concerns about Iragile bones have joined worries about being overweight and at risk for heart disease in prompting millions of women near or past menopause to start exercising. Having heard that exercise can help maintain and even increase bone mass, they are walking, running, swimming, cycling and even lifting weights to ward off the fractures caused hy osteoporosis.

But many exercise enthusiasts are not getting the benefits they think they are, recent studies indicate. Not all kinds of exercise are equally peneficial to bone strength and some types may do little good. And exercise is but one of three

crucial factors in maintaining healthy bones. The other two, an adequate intake of calcium throughout life and, for women at or past menopause, estrogen replacement therapy, comple-ment the effects of exercise and may even be

essential to its potential bone-building benefits. Dr. Morris Notelovitz, an osteoporosis spe-cialist in Gainesville, Florida, warns that women who think they need not worry about calcium or estrogen because they exercise regularly could be mistaken.

Osteoporosis is a debilitating and sometim fatal disorder of fragile bones. In the United States, it causes 1.3 million bone fractures a year at an annual cost of \$10 billion. The size of the problem is expected to grow as people continue to live longer and as baby boomers who grew up on soft drinks instead of milk pass the big 5-0.

After the age of 35 women lose bone mass at a rate of i percent a year, a rate that doubles or quadruples after menopause. In the decade after menopause, women typically lose 5 to 10 percent of the hone-sustaining minerals in their spines

As a result, according to the National Osteoporosis Foundation, one-third of American women over 65 suffer spinal fractures and 15 percent break their hips because of osteoporosis. For men, significant bone loss usually starts 10 to 20 years later than in women. Men have denser bones to begin with, and the predominant kind of hone that men lose is less crucial to overall bone strength.

But men, too, are affected by osteoporosis; a quarter of hip fractures occur in men. And imong men who reach their 80s, one in six will

As with many other things in life, if you do not use bones, you lose them. Using bones means working the muscles that support them against a resistant force like gravity. Bone is built up in response to stress and breaks down almost as soon as the stress dissipates. Thus, astronauts outside the tug of gravity and people bedridden by illness or disability lose bone very rapidly. Many studies have indicated that exercise

can help to maintain and even increase the

licycle Racing in the Age of Indurain

For example, a study at the University of California in San Francisco found that men in their 20s who combined weight training with aerobic exercise for an average of six hours a week for at least two years had denser spinal bones than men who did only weight training or only aerobics. In turn, all those groups had denser bones than a comparable group of sedentary men.

Bone is a "fluid" tissue, constantly being broken down and reformed. To favor buildup over breakdown, the muscles attached to the bones must be contracted and strengthened. This produces piezoelectricity, a force that results in bone deposition at the stress points.

Unless bones are repeatedly subjected to stress, the breakdown process outruns the buildup and bones gradually become porous and weak. Activities like weight lifting that involve high loads and high stresses (and consequent muscle strengthening) are more effective at building bone than activities that involve many repetitive cycles, like running, walking or

Strength training like lifting weights or working out on resistance machines has recently emerged as one of the best ways to strengthen bones in the spine and elsewhere, even in the elderly. Alternative activities include using a rowing machine or an exercise cycle with increased resistance on the flywheel

The benefits of exercise to bone seem to be specific to the activity. Thus, runners and cy-clists tend to have denser bones than sedentary people in their legs and hips, but not in their arms or spines. Tennis players have denser bones in their playing arm than in the arm that merely tosses serves. Swimmers who do a vigorous crawl would have denser bones in their arms and shoulders than in their legs.

To strengthen bones bodywide, a variety of activities should be pursued that use different muscles against resistance, for example, cycling

LTHOUGH exercise is the only way known to increase hone mass after a person's 20s, it cannot work without the proper support. This means taking in an adequate amount of the bone-building mineral calcium, preferably from food and if not, through supplements: 1,000 milligrams a day before menopause and 1,500 milligrams

Nor can exercise alone increase bone mass enough to offset the losses that result from estrogen depletion at menopause. Thus, experts in osteoporosis often recommend estrogen replacement therapy for all post-menopausal women who can use it safely.

Furthermore, they recommend adopting bone-building living habits during the teenage and young-adult years to establish a larger

Ideas for a Bone-Building Workout

Aerobic exercise like running may help increase bone mass in the lega, but won't necessarily help bones elsewhere (in the arms, for example) unless done with hand weights. Here are some exercises that target the spine and upper

MUSCLE-STRENGTHENING: FOR SPINE AND HIPS

isometric abdominal contraction Strengthens abdominal muscles, which protect the back against

Lie on back, press lower back against floor, bend knees to 90 degrees. Tuck chin to chest and contract abdominal muscles. Hold position for 10

Back extension Strengthens back, buttocks and hamstrings.

Begin on all fours. With back flat. lift one leg so heet is level with buttocks. Contract buttocks and thigh; hold for 10 seconds. When you feel balanced, lift opposite arm simultaneously with straight leg.

WEIGHT-LOADING: FOR ARMS AND UPPER BODY

Compressive loading: sitting push-ups Seated in a chair with your feet on the floor, grasp edge of chair seat. Straighten arms to raise yourself an inch off the chair (do not lock elbows); hold your weight on your hands for 10 seconds. Slowly bend elbows to lower vourself.

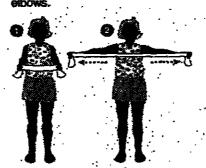

Tensile loading: bar hang Hang from a bar for 10 seconds. NOTE: Avoid this exercise if you have a wrist, e(bow or shoulder injury.

RESISTANCE: FOR SHOULDERS AND BACK

These exercises use a resistance stretch band, a strip of stretchy material about a yard long, to counteract rounding of shoulders and back

External rotation Grasp band with both hands; keep elbows pressed against waist. Slowly open forearms outward.

Grasp band with arms stretched out in front, about chest height. Slowly open arms to the side; do not lock

Rumors Over Diet Drug Exaggerate Its Potential

By Natalie Angier New York Times Service

EW YORK - A novel type of diet drug has entered the final stretch of clinical testing in the United States and Europe, and, as might be expected with any new strategy on the weight-control front, rumors about its prowess have been greatly exaggerated.

The new medication, called either by its chemical name, tetrahydrolipstatin, or by its generic name, orbistat, works in what seems to be the sweetest-possible fashion, blocking the absorption of much of the fat that has been consumed and allowing it to pass right through the intestines before the body's annoyingly effi-cient storage system has a chance to claim it as

In so doing, the drug can help eliminate about 10 to 15 percent of the day's caloric intake with relative ease, sort of allowing dieters to cat their cake and not have it, too.

But physicians familiar with orlistat warn that while the drug could prove moderately useful for the truly obese, it is by no means a panacea, and that it will work only in conjunction with those dreary changes in eating and exercise habits that nutritionists have been harping on for years.

"This is not going to be some sort of magic bullet," said Dr. Michael Hamilton of the Duke University School of Medicine. "You're not going to be able to sit down at the table and push away six hours later expecting not to gain

Above all, doctors said, orlistat is not meant for the worried slim who wish to shed a pinch of flesh for a college reunion, "This drug is designed for those who are chinically obese, that is, percent or more above their ideal weight, said Dr. Ionathan B. Hauptman, director of therapeutic research at Hoffman-LaRoche Inc. in Nutley, New Jersey, the company that makes orlistat. "These are the people who are at increased risk of medical complications because of that extra weight. For the person who wishes to lose 10 pounds for a son's wedding, there are easier ways to do that than to go to a doctor and go on a drug like this."

The drug does not increase weight loss by huge amounts; initial clinical trials indicate that, at most, it will double the pounds lost. Usually, it will not help even that much.

In one 12-week study, for example, obese patients who were placed on a moderate diet, which eliminated 500 calories, and who were given the drug three times a day lost an average of nine pounds (about four kilos), compared with the four and a half pounds lost on average by those on the moderate diet alone. And while the drug does not seem to pose any serious medical risks, its modus operandi can result in unpleasant side effects like greasier waste and increased gastrointestinal activity, leading to

When you block absorption of lat, that far has to come out in the stool, so you end up with fattier, bulkier and slightly more moxious stools," said Dr. Xavier Pi-Sunyer, director of the division of endocrinology and nutrition at St. Luke's-Roosevelt Hospital Center in New

The drug is being tested at 100 study sites in the United States and in Europe, and about 4,000 obese patients are expected to participate in the trials worldwide. The early mals have been brief, so the current, and final, round of testing is designed to see how patients fare when they take the drug for up to two years.

The National Institutes of Health estimates that about 34 million Americans are obese and that another 34 million border on being so. Fat people are at increased risk for a host of medi-

The new medication, still being tested, works by blocking the body's absorption of fat.

cal ailments, including diabetes, heart disease. high blood pressure and cancer, not to mention the tremendous stigma they bear in a society ssed with fitness and the appearance of self-discipline

Obese people who attempt to diet have an extremely high failure rate, which exceeds the relapse rate for those who quit suicking or drinking. An increasing number of physicians are beginning to ascribe the dieter's difficulties to (actors beyond a person's control, particularly genetic predisposition.

"Body weight is really recalcitrant," said Dr. Jules Hirsch, an obesity researcher at Rockefeller University in New York. "In a biochemical and evolutionary sense, it's well wired in there, and the drive to make up lost fat is very strong.

Many doctors have also come to view obesity as a chronic and recurring disease, one in need of medical intervention beyond the classic three-minute lecture about losing weight. "Phy-sicians have traditionally looked at this as a matter of 'Pull yourself up by your own boot-straps, go on a diet and start exercising.' Dr. Hamilton said. "Well, you have to do these things for diabetes and hypertension as well, but nobody is suggesting you shouldn't also take drugs for these conditions."

With that new acceptance in mind, some doctors have begun placing patients on long-term, low doses of drugs like phentermine and fendluramine, mild stimulants that suppress appetite and seem particularly useful in keeping ost weight off.

Mixed Reviews for Autism Treatments

By Daniel Goleman

bates about ways of treating autism, one of the most disabling and perplexing of mental disorders, are fanning both hope and skepti-

On the one hand, hundreds and perhans thousands of parents and families are exultant that they seem to have found an almost magical means, called "facilitated communication," to break through the walls that separate those with autism from the world around them. On the other. many professionals and scientists, evaluating the approach with scientific tests, are likening it to a Ouiia board, contending that those who use it are unwittingly putting words into the mouths of the autistic people they believe they are helping ex-

And with much less fanfare, recent studies suggest that two other treatments, one a drug commonly used to treat obsessivecompulsive disorders, the other an intensive program of behavior therapy, may offer more reliable, if less spectacular, re-

Autism, the first signs of which emerge in a child's preschool years, is marked by an indifference to other people, repeating words over and over or other problems in

speaking, bizarre movements like hand flapping or rocking back and forth, and fixation on specific objects or daily rouace, with some being mentally retarded and others measuring above average on standard intelligence tests. While some can speak clearly, many others do not

speak at all. There is no sure cure, though a few autistic children - perhaps 1 or 2 percent at best - recover from most symptoms by adulthood. An Australian woman, Donna Williams, wrote about her recovery in 'Nobody Nowhere" which was a best seller earlier this year.

Over the years there have been a series of treatments for autism touted as breakthroughs which, after more objective inspection, have proven disappointing. Still, recent findings suggest some hope for at icast small gains. A report in The Archives of General

Psychiatry showed that clomipramine, a medication effective in treating obsessivecompulsive disorder, reduced or stopped a range of symptoms in three-quarters of 24 antistic children tested. The improvements were seen most strongly in symptoms that resemble compulsions, like hand flapping. But in many children the medication also improved their ability to make eye contact and begin interactions, reduced hyperactivity and stopped temper tantrums that had led children to bite or hit themselves.

An indirect benefit may be that this those in a compensar group of your and helps kids communicate because they are get autistic children into this freatment as less auxious, frustrated and preoccupied preschoolers and give them round the tines. People with autism vary widely in with repetitive movements that can consume hours of their day," said Dr. Charles T. Gordon, a researcher at the Child Psychiatry Branch of the National Institute of Mental Health who led the study.

Dr. Gordon said that clomipramine might be most useful with autistic people who suffer from particular symptoms compulsions like the ritualistic lining up of objects or elaborate habits like walking a fixed number of steps backward and forward when going through doors, endlessly repeating certain movements like twirling juring themselves when frustrated and being easily overwhelmed by new settings But Dr. Gordon cautioned that the findings were preliminary and that the medication may not work in all cases.

HERE has also been quiet pro-gress with intensive behavior therapy in treating autism. A team of psychologists headed by Dr. Ivar Lovaas at the University of California at Los Angeles reported in the April issue of The Journal of Mental Retardation on the progress of 19 children with autism who at age 2 or 3 had received at least 40 hours a week of behavioral treatment designed to encourage normal behavior. By age 11, most of those who received the treatment were doing far better than

clock teaching of language and social skills; "Thursday detailed liew evidence pointing a large proportion end up substantially improved," said Dr. Gina Green, director of research at the New England Center for Autism in Southboro, Massachusetts.

"Families with autistic children are on a roller coaster," said Dr. Howard C. Shane, director of the Communication Enhancement Center at Children's Hospital in Boston, affiliated with Harvard Medical School. "They get bad news when their child is young, then grow hopeful as new things come along, which then are de-bunked. Now they're poised at the top of the Six Flags ride."

What has raised hopes to these heights is a burst of enthusiasm about still another treatment, facilitated communication, in which a helper holds or braces the hand, wrist or arm of an autistic person who uses one finger to type words on a keyboard a task that, at least initially, would be impossible unaided. In themy, the helpers are supposed to "fade back" their control over the person's movements, eventually leaving them free to type messages on their

But now a controversy has erupted, as carefully controlled tests seem to show that the communication comes from the helper. or facilitator, rather than the autistic per-

IN BRIEF

LONDON (Reuter) - Astronomers on the journal Nature, Walter Jaffe of Leiden University in the Netherlands and U.S. colleagues said they had taken pictures of a anclear accretion disk which scientists have theorized surrounds a black hole. "Using the planetary camera on the Hubble Space Telescope, we have discovered an unexpectedly large disk of cool dust and gas surrounding a bright unresolved nucleus in the active galaxy NGC4261," the article said. "Clearly visible in the center of the image . . . is a sharply defined absorbing disk that blocks light from the stars behind it."

More Data for Tropics As Hothed of Evolution

WASHINGTON (WP) -- Why, evolutionary biologists have long asked each other, is life so much more exuberant and diverse in the tropics? David Jablonski, a University of Chicago expert on evolutionary theory, reporting in the July 8 Nature, offers the first quantitative evidence addressing the question. It suggests there is so much more evolution in the tropics that perhaps 75 percent of life's major anatomi-cal diversification originated there.

poor as though they were separate and distinct from the rest of us, and primarily responsible for black as though poverty and nonpoverty family instability. Perhaps now were permanent conditions. But that economic instability is reach-

nouncing the abolition of thousands of jobs this year on top of the thousands it eliminated last year, it is a loud wake-up call signaling that economic insecurity has come to the middle class in the 1990s, just as it had come to the working class some 30 years before.

This development, plus the tendency of the national leaders to M ANY studies of poverty have look for scapegoats instead of polifallen short by treating the cy solutions, has devastated the black working class and has been

when IBM joins the parade by an- ing into the middle class, the United States's leaders will take note. If they do, they will be enormously informed and enlightened by a reading of Douglas S. Massey and Nancy A. Denton's book.

Massey and Denton argue that persistent poverty among blacks in America's inner cities has been largely misdiagnosed by 20 years of studies. Poverty studies. Poverty among the under-class has been attributed to its members' attitudes and behavior and to conditions such as technological change and economic stagnation. Massey and Denton write, however, that racial prejudice and

and voluntary associations and public policies have all ensured the persistence of racial segregation and have, moreover, been missing from the analysis. The authors are clear in their

discrimination by both individuals.

focus on racial and spatial segregation and on the origin of such racist practices. "This extreme racial isolation did not just happen; it was manufactured by whites through a series of self-conscious actions and purposeful institutional arrangements that continue today," they

Massey and Denton, on the basis of extensive, highly focused and painstaking research, have arrived at the same conclusion expressed in almost the same terms as the 1968 Kerner Commission report, which informed a still unbelieving nation that "white society is deeply implicated in the ghetto. White institutions created it, white institutions maintain it, and white society con-

The authors go to considerable length to show that racial segregation in housing has not always been as rigid as today. The era of inte-grated living and widespread interracial contact was rapidly effaced in American cities after 1900 because of two developments: the industrialization of America and the concomitant movement of blacks from farms to cities."

But the authors go further. They point out the bukage between racism, the inner city and persistent powerty among African Americans: Segregation created the structural conditions for the emergence of an oppositional culture that devalues

work, schooling and marriage and that causes it, it must be said that that stresses attitudes and beha-viors that are antithetical and often hostile to success in the larger econ-

In this regard, the authors seek to

refute the theory of a "culture of poverty" among African Americans. By substituting instead their own argument for a "culture of segregation," they seem to hold that it is not because blacks are poor that they often behave in ways harmful to themselves and society, but because they are segregated. But it is difficult to see how that provides much improvement in our

understanding of either poverty or of black behavior. It may well be, as others have argued, that the ture of the people - whether they are poor or segregated, or both as out of the structure of the society that makes them poor and that seg-

the Massey-Denton arguments against segregation (while commendable on other counts) are not quite strong enough to overthrow a generation of research that suggests that the causes of black disadvantage are multiple — and include unemployment and technological change — and that most are gener-

ated from the larger society. Nor do the authors tell us enough about how blacks, whites and others can organize to help overturn segregation and racism.

Overall, however, the case they make against residential racial segregation is cogent and compelling. One hopes that the book will be harmful behavior cited above read, not only by other scholars grows not so much out of the cul- and policy analysts, but by a broad spectrum of citizens and by all the enders of the nation.

Synergy between partners, drawing on the huge potential of

Siemens AG for performance capacity far beyond the reach of Siemens Nixdorf on its own, and working with clients to plan and develop the final product: integrated solutions, from central servers in administration to process control computers in the factory - solutions which can only be provided by Siemens Nixdorf working with Siemens AG's plant, transport and automation technology divisions and public and private networks. From "Computer Integrated Railroading" - the computer-supported control and supervision of rail movements at the Munich North shunting yards - to the integration of diverse computer and database systems for a more efficient construction and redevelopment strategy at Horsham - planned by Siemens and carried out by Siemens Nixdorf. The achievements of "Synergy at work" worldwide translate into benefits for clients in every sector, from BMW to national energy suppliers such as MEW Kuwait. See this new issue of IT World News for more details.

emens

Example of synergy in telephone billing

Bangkok: Hot billing a hit at the Telephone Organisation of Thailand.

To ensure first-class service to its customers, the Telephone Organisation of Thailand (TOT) has decided to utilize "Synergy at work", by combining the Siemens Digital Public Switching System EWSD with a SINIX* computer with RISC-architecture from the Siemens Nixdorf Group. The company has installed Siemens' EWSD digital switching system which puts through several million phone calls every day, as well as recording charging units. "Synergy at work" then provides instant telephone billing at the company's branches, through direct connection of Siemens Nixdorf high-speed SiNIX computers to the EWSD, and a link to the account printer at TOT branches. Via the EWSD system, the computer is immediately informed of the duration of a public telephone call made by a TOT client. It calculates the units and charges, and prints out the account in Thai script. The advantage for the client is that it is no longer necessary to wait for the clerk on duty to read the charge meter, look in the rate list and calculate the charge. Instead, the entire transaction ope-

rates in synergy between the EWSD systern and the SINIX computer - from tariff determination right through to hot billing printout. The client then only has to go to the counter and pay, and retains the hot billing printout as a receipt.

Example of synergy in power supply

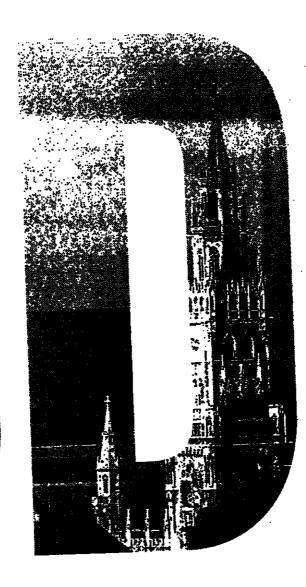

Kuwait: From high voltage network to data network "Synergy at work" covers the lot.

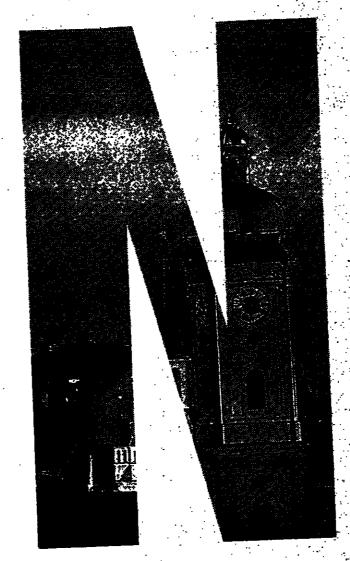

The Kuwait Ministry of Electricity and Water (MEW) is investing 130 million DM to bring itself right up to date in terms of monitoring and controlling the power station operation together with the 300/132 kV high voltage network. The aim is to create an integrated mains supply technology within 36 months, thereby making the power supply more reliable and more efficient. Siemens is providing the mains technology - using SINAUT Spectrum. Combined with this is Siemens Nixdorf's latest computer technology workstations with SINCAL SINIX software, and PCs for office automation, as well as

intelligent expert systems for troubleshooting in the event of system failures. SINCAL provides comprehensive network planning, calculation and analysis - data from the power stations and substations is transmitted, processed by the computer system and displayed on screen as compressed graphical information. Using this information, the power station operation can be perfectly coordinated and the electricity network economically operated - through optimal load distribution. As well as updating the mains technology, MEW's communications transmission network in Kuwait will also be upgraded and modified.

Example of synergy in city administration

Munich: Digital networks for closer links with the community. Siemens Nixdorf OCIS office solution, under

Siemens and Siemens Nixdorf are bringing Munich's City Administration into the hi-tech age, using an integrated data and telecommunications solution. An ISDN digital telephone network will also provide the means for rapid handling of documents and information, using Siemens Hicom telephones with Siemens Nixdorf PCs and SINIX computers. The aim of this networking is to establish a modern client-server link connected to BS2000 mainframes. All PCs will run the

the ComfoDesk graphical user interface. The result will be a complete solution linking 10,400 workstations on 250 sites into an in-house network. At the same time, the Administration's various offices, in many cases in buildings protected by preservation orders, will be spared costly cablework-ISDN provides rapid data transmission simply by using existing telephone lines. Text and graphics can be transferred within seconds. The system also takes care of time management: a central timetable stores appointment times for all parts of the Administration and facilitates the organisation of meetings. The rate at which enquiries are handled and tasks processed is markedly increased. Slow postal and internal deliveries are "out", with correspondence being sent by electronic mail via ISDN. This saves time and money, and draws the Munich City Administration much closer to the community

Example of synergy in freight logistics

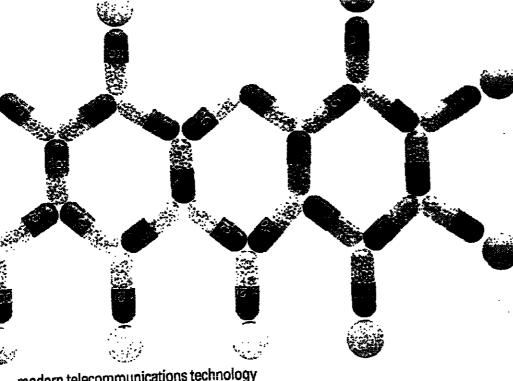

Bonn: Billion DM high-tech pac for Deutsche Bundespost

Example of synergy in pharmaceutics

Ulm: "ICCS" Merckle-ratiopharm's new success formula.

When you're dealing with the synergy between data communications and telecommunications, "Synergy at work" is the best prescription. This was the line of reasoning followed by the German pharmaceutical company Merckle-ratiopharm when it commissioned Siemens and Siemens Nixdorf. The company wanted a completely new network infrastructure to optimise the flow of management, production and logistics information. Siemens Nixdorf did the groundwork - as main contractor and systems integrator. The company installed a high-performance H90 host running under the BS2000 operating system and linked to more than 300 workstations. Added to this is the R/2 modular business management user software from SAP AG, Siemens Nixdorf's partner - with modules ranging from financial accounting to material control. The first joint project with Siemens was warehouse control. For this operation, Siemens' MOLAX modular stores management system was installed on Siemens Nixdorf SINIX open systems computers. Integrated with R/2, MOLAX gives Merckle-ratiopharm rapid goods distribution and control for the 30,000 pallet spaces available. To link the most

modern telecommunications technology into the data network, Siemens AG installed a comprehensive network: the "integrated Communications Cabling System" (ICCS), which operates over open industry and standard interfaces, integrating available installations and reducing cable quantity to a minimum. The result is that all the firm's factories can easily communicate with each other, computer to computer or telephone to computer. All via a single communications port.

With 33 new parcel post centres throughout Germany, Deutsche Bundespost has adopted a forward-looking concept for freight movement: parcel delivery within 24 hours is to become the standard. The Automation Division of Siemens AG is the main contractor for all the operational management technology at the parcel post centres. Under a 1.2 billion DM high-tech package, Siemens AG will provide the sorting and distribution systems and the automation technology, calling on Siemens Nixdorf for computer technology. The extent of this project can be seen at the first parcel post centre at Hagen-Fley. A Siemens Nixdorf MX300 coding host computer with specially developed software and connected PC coding workstations is used to ensure correct distribution of the parcels. Each parcel is marked with a barcode bearing all the information on its destination and route. A barcode reader connected to a Siemens SIMATIC control system reads

the barcodes and manages the sorting and distribution of the parcels via conveyor belts, tip-trays and chutes, until they leave the parcel post centre. This is done with such precision that up to 250,000 parcels per day arrive at the right point of destination, for forwarding to delivery areas, delivery bases, or to another parcel post centre. The smooth running of the operation is monitored by a fully-integrated reporting system on a Siemens Nixdorf MX 300 computer. The computer collects and displays operational and fault data from all the connected systems, calculating and monitoring system availability levels. All the parcel post centres are scheduled for completion by 31 December 1994, creating a nationwide logistics system which will reduce the number of handling stages per package from up to nine at present, to only two. Later a tracking and tracing system will be introduced to provide a comprehensive parcel follow-up service.

Example of synergy in public administration

system.

Horsham is located just 40 kilometres from London and has to cope with the challenges of being a successful and growing town close to a metropolis. To deal with the constantly changing needs in housing and business re-developments, Horsham District Council has implemented one of the UK's most ambitious local government IT projects. In the first phase of the project Siemens Plessey worked closely with the Council and carried out a detailed A employee survey that defined in-

formation "workflow" through-

out the organisation. From this information Siemens Plessey

created a corporate data model (CDM), which was used to develop a blue-

print for the efficient

running of the Council

and to inform future IT

implementations. In the

second phase of the pro-

tion to advise its installa-

tion of an advanced geo-

intophation system ur

the Council's planning.

department. SICAD was

implemented on a mainframe as well as

on four UNIX* and three PC workstations.

Around 700 Ordnance Survey maps for the

Horsham region were fed into the system. A further 300 sets of maps on statutory building restriction building records were also added. SICAD will soon also be accessible on an existing property, geographical and historical databank, and via a registration

system. With this databank, Horsham's council personnel can respond quickly and in

detail to enquiries on building approvals, for example when they deal with environmental,

legal or historical enquiries. For this, SICAD data will be retrieved via networked computers and assembled in the appropriate format. The information is then transmitted back and forth between the appropriate departments - without the need to struggle through a jungle of papers and maps, or having to spend hours searching through archive material. According to Martin Pearson, Horsham's Chief Executive Officer and prime initiator of the IT project: "With Siemens Nixdorf's geo-information system, we have access to a huge volume of information of benefit to all sectors of the com-

gh-tech pad

espost.

sted, the telephone number connection details are entered on the data base by the operator. The BS2000 computer then commands the EWSD system to make the line available. Charging details from the EWSD system are transferred to the BS2000 computer once a day and then conveyed in their processed form to the OPTV computer center for invoicing. As well as achieving new levels of cost effectiveness in network operation, ÖPTV, working with Siemens and Siemens Nixdorf, is setting new standards

of technology for telecommunications in

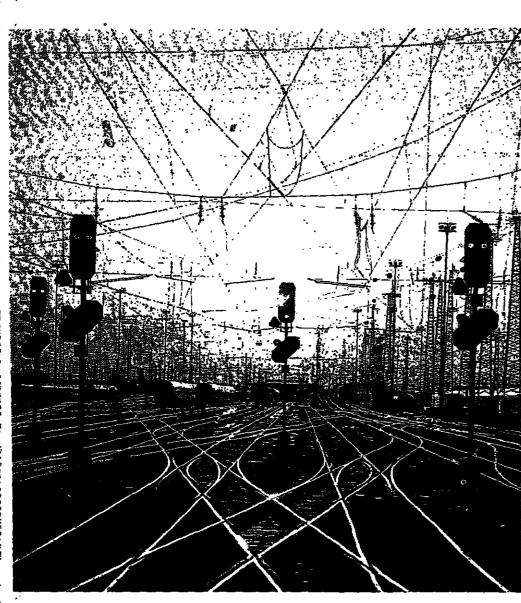

E SIEMENS I NIXDORF

Example of synergy in police operations

Vienna: Better informed and faster on the spot, using Pfeil2000.

In traffic accidents, break-ins and robberies, every second counts, and police operations must be perfectly planned. A technical fault or incorrect information supplied to those running the operation can result in a fiascoand in extreme cases can even cost lives. So, after intensive evaluation of different systems, the Federal Ministry of the Interior ordered "Synergy at work" for the Vienna police force - to establish an integrated operations control system. The hardware and network technology for this system comes from Siemens Nixdorf, and the application comes from Siemens equipment technology. The result is Pfeil2000. The cornerstone of this solution is the Siemens Nixdorf C50-Servers, which are networked with PCs at the operations control headquarters - giving a client-server link which

nonitors all communications facilities as well as reports of accidents and break-ins. Pfeil2000 knows straight away where an emergency call has come from or where an alarm button has been pressed. As a further expansion stage, a graphics system will be networked with Pfeil 2000 to aid the police in further operational planning: street maps and building plans will be displayed in a flash. All available resources will then be precisely located and depicted in three-dimensional form via an integrated system of coordinates. Pfeil2000 also records all telegraphic data - so later on the operation can be reconstructed, right down to the smallest detail. The client-server architecture of Pfeil2000 additionally guarantees maximum system availability: if one computer fails, another can immediately take over.

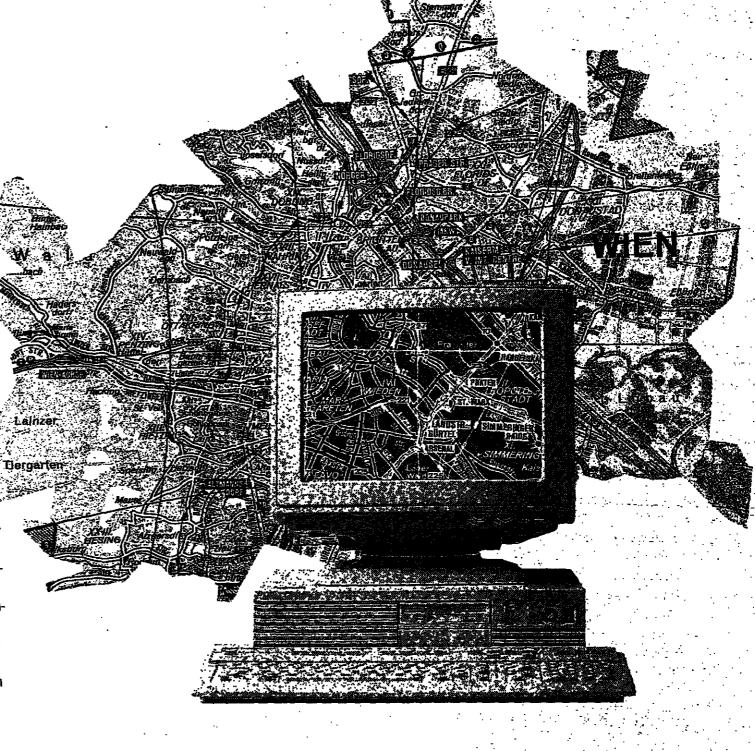

Example of synergy in traffic engineering

Munich: Management system signals the way ahead for Munich North shunting yards.

Siemens and Siemens Nixdorf are looking to put German railways on the right track into the next millenium, with the introduction at Munich North shunting yards of what this forward-looking company eventually plans to implement over the entire rail network: "Computer Integrated Railroading", or the control and monitoring of rail traffic with up-to-the-minute computer technology. As part of the TS '90 transport control system, Siemens Nixdorf has assembled a powerful management system consisting of two H60 processing computers running on the BS2000 operating system, networked workplace servers and portable minicomputers for mobile data acquisition in

dialogue mode by radio. Linked with two H60 computers in the Deutsche Bundesbahn computing centre in Frankfurt, these form a powerful systems configuration for rapid and reliable cargo dispatch and freight monitoring of travelling and stationary rolling stock. Which train is arriving from where, at what time and with which wagons? When the train arrives, which wagons need to be put together to form new trains? Thanks to the latest computer technology from Siemens Nixdorf, railway dispatchers have immediate access to this information. All other aspects are managed by "Synergy at work". For completion of shunting operations, information is sent to the Siemens MSR32 process control system, which

works with an electronic interlocking unit to control and monitor the remote radio-controlled hump locomotive, clasp retarder, propelling system, signals and points. Trains are dismantled and reformed completely automatically. The automated system operating in Munich is setting the trend for the rest of Germany - and Europe. In-house operations are optimised, shunting operations are controlled effectively, and every link in the logistics information chain from consignor to consignee is covered by continuous monitoring. This means that better use can be made of rail transport capacity, moving German railways one step closer to the goal of "Computer Integrated Railroading" nationwide.

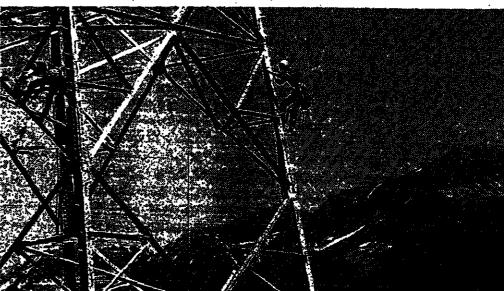

Example of synergy in power supply

Maria Enzersdorf: Lower Austria Energy Authority plugs in to "Synergy at work".

As a major regional electricity supplier, the Lower Austria Energy Authority (EVN) must organize power distribution with maximum economic efficiency and reliability. This is why EVN is now calling on the services of Siemens Nixdorf, as well as Siemens AG. Siemens Nixdorf's SICAD geographical information system will be used to manage the operation controlled at regional network centres by the SOSYNAUT Siemens software package (in the 100 kV network) and the Siemens SINAUT Spectrum EDP system (in the 20 kV network). These supply power to 670,000 standard charge clients and 3000 special users. The first step has been installation of detailed monitor displays for computers at regional network centres, replacing the previous, oversimplified picture of the supply area. Major changes - for instance, to switching configurations - involved a labo-

rious procedure of moving pins around a chart. Now SICAD helps to update the current status, digitise the information and read it into the regional network centre system. EVN is planning to integrate SICAD and the regional network centre computers even more closely. The synergy will lie in changes to switching configurations, for example, being implemented directly in the SICAD system, and then being passed on automatically to the computers at regional network centres. The data exchange between the two systems will also enable network calculations to be performed in the SICAD system, and provide all the information required for economically efficient and reliable network operation - from load distribution and forecasting preventive maintenance, right through to power consumption and fault statistics.

Old Road to New Markets Trade With Russia Brings Back Barter

By Lawrence Malkin nternational Herold Tribune

NEW YORK - You are the marketing director of Crosstech Communications and are trying to sell a phone system to the Republic of Wollenska, which broke free from the Soviet orbit in 1990. Wollenska wants to revive its newly privatized

petrochemical industry, but it lacks the foreign currency to bring it up to Western standards. Naturally the winning bid must pass muster with the Communications Ministry, which wants to build up Wollenska's electronics industry in the capital city of Segonia. But it must also be approved by the Development Ministry, which wants

to build up the petrochemical industry. Crosstech is about to propose manufacturing some of the components for the phone system in Segonia, when the marketing director of Brace Electronics, its principal competitor, is spotted in the bar of the Metropole Hotel, deep in conversa-

tion with the vice president for operations of TransColumbia Gas, a Canadian petrochemical company already doing business in Wollenska.

This scene "gives you an idea of what it is like to do business in Russia now," said Frank Horwitz, who were it in a prochabor he operations for business. who uses it in a workshop he organizes for business executives and students and at seminars run by government ministries and companies in Portugal.

South Africa, Spotland and Canada.

Mr. Horwitz is one of several hundred East-West trade specialists now operating out of Vienna, Hamburg, London and New York.

"I don't know what the central bank's regula-

tions are now in Moscow because they change so fast, but I can always find someone who does," Mr. Horwitz said. "It will take the Russians a genera-tion to learn how to do it our way, but meanwhile, this is how you make money."

Mr. Horwitz is a countertrader who started off selling General Electric Co.'s high-technology short of foreign exchange. He now runs the grand-ly named Uni-Source Global Corp.

Its four-person office in New York's Greenwich

Village can be expanded to two dozen part-timers with Rolodexes in Cyrillic letters whenever a client comes in with a deal like Wollenska's.

This old-fashioned kind of trading makes economists unhappy, as their elegant models work better with money than with barter commodities such as rough diamonds, uncut timber, nonferrous metals or crude oil. Few are more distressed than Jeffrey Sachs, the Harvard professor who advises President Boris N. Yeltsin's government in Moscow. He

points out that there is a foreign-exchange market for rubles and that their value is listed regularly in this newspaper and others, making them a convertible currency - at least in theory.

But he does concede that tax evasion, export licenses and other remnants of the old regime help produce a "locus of corruption that gives rise to a lot of screwy deals."

Last month, a cash shortage forced the Russian government itself to resort to barter. Its Luxembourg bank accounts frozen by a court decision

'It will take the Russians a generation to learn how to do it our way, but meanwhile, this is how you make money.' Frank Horvitz, an East-West trade

favoring a Swiss concern. Compagnie Noga d'Importation & d'Exportation, the Russian central bank said it was ready to pledge strategic and other minerals as collateral for its debts.

Even the largest multinational concerns admit privately that they have to barter to do business in lussia because, as James Searing, the partner specializing in Russia for the accounting firm of Ernst & Young, says, "Right now and for the foreseeable future it's a resource game there."

The objective is to build up the business in

Russia and think about repatriating profits later. After a slow start, according to East European Investment Magazine published in New York, American investment in the region led that of all other countries last year, and 78 deals worth \$3.2 billion, or two-thirds of the U.S. total, were done in Russia, presumably because American companies are comfortable operating in markets of continental size.

PepsiCo, already well-known for its ability to turn its East European soft-drink profits into Russian vodka for export or Romanian furniture for its American Pizza Hut chain, recently used its rubles to buy decommissioned Soviet submarines and sell them for scrap in the West. McDonald's, meanwhile, is planting its hamburger profits in Russian real estate and agricultural suppliers. The U.S. government is also under pressure to

Franc Spends **Bastille Day Under Siege**

Compiled by Our Staff From Dispatches to 7.28 percent from 7.30 percent LONDON - A war of nerves in the Bundesbank's report

ground on in the European Mone- which is a key indicator of sho tary System's exchange-rate mecha-nism Wednesday as market players ignored Bastille Day in France and kept up pressure on the franc. The French currency spent most of the day around its recent low

level against the Deutsche mark despite Bundesbank intervention to support it. Analysts said much now depended on whether the German central bank cuts interest rates Thursday. A rate cut would ease the dilem-ma felt by France, which as one London currency trader said "des-

perately wants to cut rates" to revive its limp economy but - bar-ring a devaluation or a withdrawal from Europe's currency grid cannot do so unless German rates

The mark opened at 3.4175 francs and his a high of 3.4191 francs before slipping to 3.4165 late in the European day. Its ceiling rate in the exchange-rate mechanism is 3,4305 francs. The mark was quoted at 3.4162 francs Wednesday

afternoon in New York. David Cocker, treasury adviser for Chemical Bank in London, said, "It's a question of whether the Germans want an exchange-rate mechanism to exist or not."

If they do not, he said, then France will pull out of the currency grid - a system of maximum and minimum exchange rates for nine European Community currencies - because it "won't be prepared to push interest rates" up to the levels necessary to keep the franc's value within its prescribed range.

He said he thought Germany was prepared to help, first by offering oral support and intervention in the currency market and ultimately by cutting interest rates. But he said a reduction was un-

likely to come from the Bundesbank policy-making council's meeting Thursday, as growth in Germany's M-3 money-supply measure was still above the Bundesbank's target range of 4.5 percent to 6.5 percent and German inflation was still too high. Some also said that Wednesday's

term money market rates, mad lowering of official rates Thursd

Hermann Remsperger, chi economist for Germany's BH Bank, said, "To cut rates with the sole reasoning that it would he the French franc would not be the Bundesbank's tradition."

But the absence of an "instan rate cut will put the French franc a very precarious position," or London bank dealer said. The market was deeply divided in its expectations for the French currency, however. While some ex-

pected a devaluation or a departure from the grid. The other view is, they [France and Germany] will do everything to maintain the mark-franc parity," one trader said. President François Mitterrand gave the franc verbal support, say ing in a television interview that

France would defend it and thatthe franc-mark exchange rate was a matter of the highest priority within the European Community.

Traders said pressure on the franc was heavy and trading vol-ume large despite the French holi-day. The Bundesbank confirmed it had intervened to support the franc. Dealers in New York said the Bank of France also had been. intervening directly in the market. after a period of intervening indi-rectly through Banque Nationale

And despite the holiday, traders said, French commercial banks bought small amounts of frances early in the day, possibly currying out orders for the Bank of France.

The franc's plight was seen as similar to that of sterling before it pulled out of the exchange-rate mechanism in September 1992; Britain at that time felt constrained by high German interest rates from easing credit to boost its economy and ended up tightening its policy to defend the pound. The Danish krone also was un-

der pressure Wednesday, with the Danish National Bank intervening at the currency's lower exchange-

Authority INTERNATIONAL MANAGER at work".

Homosexuals Find Rise In Workplace Tolerance

By Pam Kruger New York Times Service

FW YORK — For seven years, Bruce Pfrommer, an advertising executive in Colorado Springs. Colorado, hid his homosexuality from colleagues. "I imagined the worst-case scenario of someone wanting to fire me," he said of the prospect of coming out of the closet, and I thought: I can't sacrifice everything I've done." But last November, when Colorado adopted Amendment 2 to ban laws that protect the civil rights of homosexuals, Mr. Pfrommer said he felt compelled to act. He joined a local homosexual

rights group and literally overnight was named its spokesman.
The next day, he told the president of the advertising agency that he was a homosexual and would be a leader in the fight to. sured him that his job was secure, then told him her own se-

companies to overturn Amendment 2. She as- saieguard their jobs.

Executives count on

their value to their

cret: She had voted for the initiative. "I think she still supports it," he said, "but she also supports me."

Mr. Pfrommer is one of a growing number of executives who have found that their work environments have evolved enough for them to openly declare homosexuality without jeopardizing their positions. In part, their high-level jobs often protect them. Said Mr. Pironmer: "I wasn't taking into account my worth as an employee and that coming out wouldn't change that."

George Doomany, a managing director at Bankers Trust in New York, agreed: "I'm confident of my abilities and that people respect my abilities. That might give me the confidence to be more open, whereas I'm not sure that someone in a clerical capacity would have that confidence. Rather than an executive being a limiting thing, it's an opportunity."

Homosexual workers appear to be finding tolerance in the workplace, but only a small fraction of the those in upper management are thought to be public about their orientation. Gay executives have traditionally been reluctant to acknowledge their sexuality for fear it would derail their careers.

Among prominent business people, David Geffen, chairman of the record and film companies that bear his name, is one of the few openly gay executives, having revealed his homosexuality last year. The higher up you go, the deeper the closets get," said Ed Mickens, the editor of Working It Out, a New York-based newsletter about homosexual job issues. Nonetheless, many gay executives are going public, largely, they

Official

Surplus

Says Japan

Will Linger

By David E. Sanger

New York Times Service

TOKYO - Five days after Pres-

ident Bill Clinton and Prime Minis-

ter Kiichi Miyazawa announced a

broad framework for trade talks,

Japan's top trade official said the

United States should not expect his

country's trade surpluses to go down in the next two years.

day that while the agreement calls for a highly significant decrease in

Japan's surpluses over the medium term, the sluggishness of the Japa-

nese economy will keep imports low for quite some time. He said medi-

um term meant around five years.
"My personal view is that in the

coming two years the imbalance

will not decrease much," said Mr. Okamatsu, vice minister of the

Ministry of International Trade and Industry, the highest career ap-

pointee in the ministry and usually the most influential policy voice. "Frankly, in this calendar year the

imbalance will grow."

He appeared to be interpret the

vague framework quite literally, noting that despite the U.S. insis-

tence that an understanding exists about how to define the term

"highly significant," the Japanese did not believe they were commit-

ted to specific cuts.

"I don't believe that the present level of imbalance is normal, so we

should take comprehensive mea-sures to correct it." Mr. Okamatsu said. "But the U.S. says that means

it should go down to 2 percent of

our GNP, and there is no agree-

ment on that at all. There is no

numerical target."
Following the agreement Saturday, several U.S. officials used the

2 percent of gross national product

figure, suggesting that it was part of an informal understanding.

Sozaburo Okamatsu said Thans-

International Herald Tribute

BRUSSELS — European Community negotiators failed Wednesday to win an agreement to further reduce imports of Japanese cars into the depressed EC market, disappointing Europe's ailing manufacturers. EC officials claimed that Japan tacitly agreed

on the need for a bigger cut in imports in 1993 than the 9.4 percent reduction agreed in April, but they said that a formal accord was not likely se officials stressed a need to agree of

tion and shipment schedules for this year. As a result, officials and automakers said Japan was likely to see a significant jump in its share of the European market this year, and face strong pressure to compensate by accepting new restraints running into 1994 and perhaps beyond. The only thing that the negotiators agreed on in the talks, which began on Monday, was that Japanese officials acknowledged that overall car sales in Europe this year would drop by far more than the 6.5 percent forecast that was used as the basis for the April agreement. Robert Verrue, the chief EC negotiator, said

Japan's acknowledgement of the plunge in sales implied that it would eventually accept bigger export reductions. The negotiations are taking place under a

1991 framework agreement that will gradually remove restrictions on Japanese imports in five EC countries by 1999. That agreement includes an understanding that both sides will share in market ups and downs in the interim. Mr. Verme said car registrations have fallen

by as much as 19 percent in the first six months of this year, and that the Community now is predicting a decline of up to 16 percent for the full year. That means a drop of slightly more than 2 million vehicles from the 1992 total of

He refused to say if the Community would insist that, as under the April agreement, Japan's exports should be reduced at a rate greater than the fall in the overall market.

refused to commit themselves to new cuts. "We understand the market is worse" than in April, said Norivasu Yamada, an official at the Japanese mission to the Community, but not so bad as explained by the commission."

Other Japanese officials indicated that Japan was irked by the EC request to reopen talks on

was faced by file by figures to teopen task of import levels only weeks after striking the previous agreement in April. They said Japan wants to establish clear guidelines for monitoring the market and adjusting imports before agreeing to any figures for 1993.

Even with tighter export restraints, Japan is gaining market share because its automakers are boosting production at new European plants, the so-called transplants.

The automakers' association expects transplant production to grow to a little more than 450,000 vehicles this year from just over 300,000 in 1992. That more than exceeds the drop of about 100,000 in imports agreed to in April, to about 1.089 million.

Japan's automakers concede the political need to reduce exports further, but they want to stretch out the pain.

A Fourth Devaluation Is Forecast for Peseta

MADRID — The peseta seems to be headed for its fourth devaluation in a year, traders and analysts said, as investors question Spain's ability to keep interest rates up

with its economy at rock bottom. "There's a big crisis looming for the pescia," said Michael Burke, an economist at Citibank in London. "It's highly likely that Spain will be forced to devalue for a fourth time. and I wouldn't even rule out that it will eventually give up the struggle and call it a day in the European exchange-rate mechanism."

The Deutsche mark has risen more than two pesetas against the Spanish currency in the past week to stand at 78.72 pesetas late Wednesday. Traders expect the mark to reach 80 pesetas soon, bringing it close to its ceiling level in the European currency grid of 80.85 pesetas.

"The choices are really limited when the economy is shrinking, unemployment is rising and interest rates are still high," Peter Wheeler-King, chief foreign-exchange trad-er at Banesto in Madrid, said. "The question isn't whether the peseta will be devalued again, but how many devaluations Spain can go for without losing investor confidence completely.

As Prime Minister Felipe González announced his new cabinet this week, including Pedro Solbes

as finance minister, the Finance Ministry revised its growth fore-casts for 1993. Gross domestic product, previously predicted to: grow I percent, is now expected to shrink 0.5 percent. In the first quar-ter, GDP fell 1.1 percent.

With no signs of recovery in sight, until 1994, unemployment running at record levels and a stubbornly high inflation rate, Mr. Gonzalez and his new cabinet face an almost impossible task, analysts said.

Moreover, Mr. González is now leading a minority government, al-ter both the Catalan and the Basque nationalist parties snubbed his offer of a coalition. His Socialist Party won a fourth term in office in elections June 6 but lost its absort lute majority.

This government is particularly badly positioned to enforce a strike gent fiscal and economic policy;
Mr. Burke at Citibank said.
To cut unemployment and cutinflation, the government must
achieve a social pact with the trade unions and employers, analysis said. They said wages, which have risen an average of about 7 percent this year, have been the major con-tributor to the inflation rate, which stood at 4.9 percent in June.

With the unemployment rate at 16.6 percent in June, according to the Labor Ministry - the Econos

U.S. Consumer Prices Steady in June 107 11/32, where its yield was just 6.56 per-

By Robert D. Hershey Jr.

New York Times Service
WASHINGTON — American shoppers increased spending at retail stores for the third straight month in June while prices for these and other consumer purchases remained unchanged, government reports showed Wednesday.

The Labor Department published its sec-

ond highly favorable inflation report in two days. The consumer price index was stable Inflation news leads to broad-based gains on Wall Street, Page 14.

last month after edging up only one-tenth of 1 percent in May, a two-month performance was the best since February and March

On Tuesday, the department reported that prices received by U.S. producers fell three-tenths of 1 percent in June. This gauge is the narrower one since it does not include im-

ported goods or most services.

Analysis said the latest batch of data was solid confirmation that the economy continperiod out modest gains, a situation that combines with subdued inflation to require neither lower nor higher interest rates from

the Federal Reserve Board "The Fed is on hold," said Darwin L. Beck, an economist for First Boston Corp., perhaps for the rest of the year and even well into

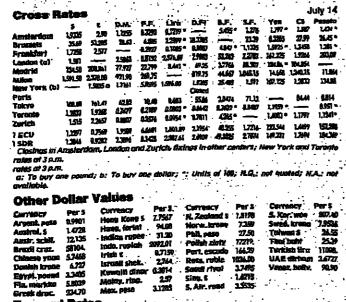

Such sentiments helped fuel a bond market rally, pushing down yields on U.S. Treasury bonds to record low levels. The bellwether 30year government bond was up 23/32 point, at

cent, down from 6.61 percent on Tuesday. The fall in interest rates also pushed stock prices higher and helped depress the dollar. The rise in retail sales, which account for about one-third of economic activity, was four-tenths of 1 percent, to \$171.86 billion, the Commerce Department said. This by itself would have been considered lackluster but sales for April and May were both revised upward, each by three-tenths of a point. That means retail sales for the spring quar-

three months of the year, when consumers went into a post-holiday slump. The automotive sector paced the June gain with a 1.2 percent sales spurt as strength continued to shift into durable goods, those designed to last three years or more.

ter were 1.5 percent ahead of those in the first

Price Data Boost Stocks and Bonds

Compiled by Our Staff From Disputches NEW YORK - Stocks rose Wednesday, boosted by good inflation news that sent bond prices surging, but equities ended below their best levels of the day and bank stocks were weak.

The Dow Jones industrial average gained 27.11 points, to 3,542.55, but the blue-chip indicator slipped from

N.Y. Stocks

its high of more than 3.550. Rising issues on the New York Stock Exchange outnumbered decliners by a .-10-⊋ ratio.

The impetus for the rally was the novernment tenori that consumer prices were unchanged in June. The news coupled with a favorable report on wholesale prices Tuesday, squelched fears of inflation that had been building in previous months. Without inflation pressures, analysts foresaw little chance the Federal Reserve Board would

raise interest rates. Accordingly, bond yields fell across the board. The beliwether 30-year Treasury bond returned 6.56 percent, down from 6.61 Tuesday, while 10-year notes were paying 5.70 percent, down from 5.74. The three-month Treasury bill was discounted at 2.99 percent, down from 3.03, providing a yield of just

3.06 percent. As inflation concerns receded. gold prices fell, with the August fu-I tures on the Commodity Exchange dropping \$3.10 a share, to \$391.40.

Marion Merrill Dow Announces Cuts

KANSAS CITY, Missouri (AP) — Marion Merrell Dow Inc., the pharmaceuticals concern said Wednesday it would cut 13 percent of its workforce, partly in a reflection of pressure to maintain profits in the face

of growing criticism about prices.

Most of the up-to 1,300 full-time job reductions will be in the United States, including a plan to eliminate about 275 of the current 1,500 sales representatives and managers, the company said. Marion Merrell Dow's corporate parent, Dow Chemical Co., said the restructuring charge would reduce its earnings by about \$81.8 million.

Bowater to Cut Newsprint Output

DARIEN, Connecticut (Bloomberg) — Bowater Inc., the largest U.S. newsprint manufacturer, said it would ext annual production 16 percent. The reduction would lower the total amount of newsprint manufac-nured in North America by about 1.5 percent.

ITT Studies Changes to Trim Costs

NEW YORK (Bloomberg) — ITT Corp. said a study of its support operations initiated June 1 could result in measures saving the company

about 565 million a year after taxes.

About 4,000 of ITT's 106,000 employees are affected, and some jobs will be eliminated at company headquarters in New York; in Secancus, New Jersey, and at the headquarters of its eight major units.

Regional Banks Report Earnings

CHICAGO (Bloomberg) — First Chicago Corp., the nation's 13th-largest bank holding company, said second-quarter earnings jumped almost five times, to \$169 million, on increased revenue from credit cards

amost rive times, to \$159 intimot, on increases some contents and securities trading.

Meanwhile, in Winston-Salem, North Carolina, Wachovia Corp. said second-quarter earnings rose 13.4 percent, to \$123.1, million from the same period a year earlier. It cited increased fee income.

Schwab Quarterly Earnings Up 71%

SAN FRANCISCO (Bloomberg) — Charles Schwab Corp. said second-quarter earnings surged 71 percent, to \$31.6 million, led by growth in revenues from commissions.

The biggest U.S. discount broker said it expected third-quarter financial results to be better than last year's.

Genentech's Profit Climbs Sharply

SOUTH SAN FRANCISCO, California (UPI) - The biotechnology giant Generatech Inc. reported second-quarter earnings of \$10.4 million on Wednesday, a threefold increase from \$3.4 million in the same period a year ago. The company said rising product sales and contract revenues helpd boost its inomee. It was the second straight quarter of major earnings gains for Genentech, which is 60 percent owned by Roche Holdings Ltd.

For the Record

CS First Boston Group announced that Archibald Cox Jr., president of The First Boston Corp., submitted his resignation. Sundstrand Corp. reached an agreement for AlliedSignal Inc. to buy its Data Control Division for \$195 million. (Knight-Ridder)

Sony Music Entertainment has acquired CAMI Video, a production and distribution arm of Columbia Artists Management, which represents many musical superstars.

President Bill Clinton picked Stanley Tate, a Republican and real estate developer, to be chief executive of the Resolution Trust Corp. (NYT) Gannett Co., which operates in the newspaper, radio and television field, said it earned \$113.65 million in the second quarter, compared with earnings of \$97.84 million in the same period a year ago. (Bloomberg) Rubbermaid Inc. said second-quarter earnings rose 16 percent to \$50.6 million as the nation's largest housewares company introduced an average of one new product a day.

YD'S: Prosecutors Open Criminal Investigation of Gooda Walker

Continued from Page 1
inquiries by the Serious Fraud Office into
Gooda Walker. Gooda Walker had gone into
voluntary liquidation — similar to bankruptcy
— in 1991. Its principals, Tony Gooda and
Derek Walker, were replaced by a court-appointed administrator. Ken Randall, a former
regulator at I love's regulator at Lloyd's.

Documents turned over to the fraud office by Mr. Randall were the basis of the criminal investigation, officials said.

Lloyd's said that it was continuing its own investigation into Gooda Walker.

"In view of the complexity of the information having to be examined, these enquiries are not yet complete, but they are being conducted as speedily as possible consistent with a thorough approach." Lloyd's announced in a statement.

Last month Lloyd's amnounced that it had incurred losses of \$4.3 billion in 1990, the most recent year for which full results are available under its system of waiting three years for all claims to be tallied. The results for 1990 fol-

Lloyd's is now seeking to attract new financ-

"Lloyd's and the SFO continue to cooperate ing by allowing investment groups, pension funds and companies to invest for the first time in the insurance market alongside the wealthy

in the insurance market alongside the wealthy individuals who have always backed the policies issued by Lloyd's.

But the Lloyd's survival plan depends to a great degree on its ability to settle litigation brought by the names, and the criminal investigation will almost cartainly reduce the chances of the names being willing to settle their lawsuits quickly.

British Aerospace Regains Favor Investors Warm to Management's Plan for Company

By Richard W. Stevenson

New York Times Service

LONDON — By rights, these should not be happy times for British Aerospace PLC. Britain's dominant military contractor and a major exporter of fighter planes, missiles and ordnance. Spending on weapons is being reduced all over the world; Britain itself recently said it would slash the defense budget by

\$2.25 billion, or more than 6 percent. Yet British Aerospace is riding a wave of newfound investor confidence that has sent its stock up sharply since last fall.

Investors and analysts have been won over by a new management team led by John C Cahill. The team has shown its ability to guide British Aerospace safely not just through the downturn in military spenbut out of a series of other problems. Those problems include weakness in its small-aircraft business, years of losses at its Rover automobile subsidiary and a cyclical down-

turn in its commercial real estate unit. "The new management very rapidly recog-nized the scale of the problems and made provisions to deal with them," said Keith Hodgkinson, an analyst at Lehman Brothers in London. "The stock has performed well because the management by and large has delivered on recognizable solutions to the

British Acrospace's shares closed Wednesday at 418 pence (\$6.24) on London's stock exchange. That was below their recent high of 429 pence but still almost four times their low of 107 peace in September 1992, when the market seemed to judge the company a goner.

Many analysts say the price rise is not yet over. Mr. Hodgkinson said the shares could

INTERNATIONAL STOCKS

reach 600 pence by 1995, given the earnings improvement he sees coming. Nick Cunningham of Societé Générale Strauss Turnbull in London said a share price of 500 pence in the short run — and perhaps 1,000 pence in the long run — is not unrealistic.

"There's still enormous upside," Mr. Cunningham said.

The turnaround began last fall, when Mr. Cahill, who took over 14 months ago, moved to stop the losses in the company's regional aircraft unit, which makes short-range commercial jets and turboprops. He set aside £750 million (\$1.11 billion) for slimming down the unit, and he reached an agreemen to place it into a joint venture with Taiwan Aerospace Corp.

Analysts said the restructuring of the re-

gional aircraft operations should insulate the company from further losses. Last year, the division was largely responsible for British Aerospace's swing to an operating loss from an operating profit in 1991. After the regional-aircraft restructuring and other charges, British Aerospace last year had a loss of £1.2 billion on sales of £9.98 billion.

Its Rover autogunit has always been burdened by a high cost structure. But in the five years since it acquired the carmaker from the British government, British Aerospace has improved efficiency to the point that Rover could turn a profit this year as sales pick up with the end of the British recession.

Perhaps the higgest question hanging over British Aerospace is whether it will remain independent. Last week, it broke off preliminary talks with General Electric Co. of Britain, which is unrelated to the company of the same name in the United States, about combining their military contracting businesses. Analysts said those talks may resume. British Aerospace also is negotiating with Matra-Hachette of France about merging their mis-

But for now, analysts expect British Aerospace to follow a strategy like that of General Dynamics Corp. in the United States: Wring profits out of core businesses and sell every-thing else when the price is right.

year earlier.

Saab Guards Niche With New 900 Model

STOCKHOLM - Saab Au-

tomobile AB plans to roll out a redesigned 900 series model next week that it hopes will ensure its future as a niche carmaker.

Some industry analysts questioned, however, if the car can achieve the goals set by Saab's joint owners. General Motors Corp. and Investor AB. On Wednesday, a five-door version of the family-sized 900

is to be launched, echoing in a smaller version the aging 900 it replaces. It will be based on a GM chassis developed six years ago for GM's Opel Vectras and Vauxhall Cavaliers. Keith Butler-Wheelhouse,

Saab Auto's managing director. said using the Vectra chassis cut development time and costs, allowing Saab to break even perhaps as soon as next year. GM said it intended to move

level luxury car" segment. But analysts cautioned that the market has moved on since the Vectra arrived, and they said the 900 may struggle to match the ride and handling of its competitors. "The real issue for General

Motors is to be able to charge a premium in main continental markets," said Adrian Waters of Ludvigsen Associates Ltd., a consulting firm in London. "It must be distanced from the upmarket Vectras," he said.

But, like other analysis, he said he was unsure whether the new 900 could woo customers away from Audi AG, a unit of Volkswagen AG, or Bayerische Motoren Werke AG. as Saub's marketing plan envisages.

Stig-Goran Larsson, head of product development, said Saab would offer a six-cylinder engine, in contrast to its traditional four-cylinder motors. the smaller Saab into the "entry-

The Vietnam Energy Bust So Far, Wells Have Come Up Empty

SINGAPORE - Vietnam, viewed as a great frontier for oil and gas development when it opened the door to foreign explorers five years ago, is shaping up as a great disappointment for the energy industry.

Of the 26 wildcat exploration wells drilled off Vietnam's coast since 1988, just one holds gas reserves of a size that would make development commercially feasible, industry analysts said. As a result, oil and gas companies have quietly begun to ess their commitment to the country.

So far, British Petroleum PLC is the Western company to make a discovery in Vietnam large enough to warrant the investment required to get the goods to market, according to industry officials.

American oil companies were shut out of Vielnam because of a U.S. trade embargo and complained loudly about the golden opportunities they were missing. Now it seems Uncle Sam served them well. "Probably the State Department did American companies a favor by keeping the em-bargo on," said David Melzer, an executive with Premier Consolidated Oilfields PLC, a British oil company that is not exploring in Vietnam.

If Vietnam is a bust, it will be a costly one. Oil companies have already spent more than half a billion dollars in Vietnam and will likely spend double that amount in the next three years, said Ian Cross, geological manager of TEDS Ltd., an energy consultancy.

"The feeling is it could go the same way as onshore Burnea," said Mr. Cross. Oil companies spent roughly \$500 million in a fruitless search of Buruna's jungles and plains beginning in the late 1980s, before the bulk of them conceded defeat.

Typically, oil companies make binding commitments to governments to spend a specified amount of money, or drill a certain number of wells, in exchange for exploration rights.

"There was perhaps a little overselling of prospec-tivity in Victnam in the early days," said James G. Ross, an executive of Gaffney, Cline & Associates.

an energy advisory concern. "The industry has a tendency to go from hot spot to hot spot."

Exploration in Vietnam has been so disappointing that an estimated 80 percent of the licensed areas have been opened up by the licensees to new investors. "People are getting desperate to find new partners before the next round of drilling," Mr. Cross said.

To discourage companies from leaving. Vietnam has begun to extend exploration licenses without requiring new spending or activity commitments. Petro-Canada Inc., Canada's national oil company, has won a six-month extension its three exploration areas.

But while giving with one hand. Hanoi seems to be taking away with the other. It recently introduced royalties on new oil and gas production, and

The U.S. trade embargo seems to have kept American companies from making a costly mistake.

raised income taxes on oil companies. "They are in danger of killing the goose even before it lays the golden egg," said Mr. Melzer.

While most energy specialists think Vietnam is less promising than originally predicted, there are those who still hold out hope. Tilak Doshi, an energy specialist with the Institute of Southeast Asian Studies, looks at the results so far and sees opportunities: While only one of the 26 wells drilled so far has commercial potential, 10 of the wells had small amounts of oil or gas. That suggests there may still be some "elephants," or large oil fields, out there. Clearly, the industry is not prepared to give up. County Natwest Wood Mackenzie of Britain said it

expected 28 exploration wells to be drilled this year in Vietnam, up from two in 1992. And it expects as many as 70 wells to be sunk between now and 1997.

Doubled Earnings In China Industry Alarming to Beijing

BELIING - China's 357,000 industrial enterprises more than dou- entirely different products. bled their earnings in the first five months of 1993, according to figures released Wednesday, prompting official warnings about an overheating econom

The statistics bureau said industrial enterprises earned nearly 51.3 billion yuan (\$9 billion) Iron January through May - 2 110 percent increase over the same period last year, the China Daily reported.

Sales were up nearly 40 percent, to 1,104 trillion yuan, and pretax profits surged nearly 50 percent, to 129.6 billion yuan.

Economists at the statistics bureau warned that the staggering increases were evidence of imbalances in the economy. Growth has surged to a rate of 14 percent a year in recent months.

"The impressive gains also con-cealed problems that, if not resolved in good time, might drain the economy and stille market demand," the statistics bureau said. The speedup in industrial production has been excessive and has created tension between different sectors of the economy.

Many of the gains were reported in large and medium state enterprises, indicating that reforms ordered in 1991 are bearing fruit and

perhaps distorting the figures.

plants and workforces with profitable businesses, often switching to

Some enterprises also eliminated support of hospitals, schools and other nonprofit operations. Analysis said these reforms could be a

major factor in the earnings surge. The Xinhua news agency attributed the increased efficiency to autonomous management, growth of heavy industry and soaring consumption in the coastal provinces.

The statistics bureau reported last week that industrial produc-tion increased by 25.1 percent in the first half of 1993, compared with the same period of 1992. Industrial growth was up a record 30.2 percent over the same month a year carlier.

■ Tsingtao Toasts a First

 U.S. companies must wait an average six to seven years for a Japanese development license, compared with two years to obtain an American patent, the U.S. General Accounting Office said.

• Dream Co., which operates hotels and pinball parlors, is seeking cour: protection from its creditors, according to Gajoen Kanko K.K., a hotel

company in which Dream Co. has about a 22 percent stake. Sharp Corp. plans to raise the value of goods it imports by 20 percent, to 130 billion yen (\$1.19 billion), during the year that ends March 31.

Japanese brewers saw beer shipments fall 1.1 percent in the first six months of 1993, to 257.11 million cases, the Nihon Keizar reported. Chrysler Corp. and Philand Motor Corp. of the Philippines plan a \$52 million car factory at the former Subic Bay Naval Station.

Lion Nathan Says It Bid for SA Brewing Assets

WELLINGTON - The New Zealand brewing company Lion Nathan Ltd. positioned itself Wednesday to overtake Foster's Brewing Group Ltd. as Australia's largest brewer by making a bid for the breweries of SA Brewing Holdings Ltd.

Lion said it had raised 260 million New Zealand dollars (\$143.1 million) through a placement of 85 million shares, mainly with Australian brokers. Terms were not dis-closed, but that amount exceeded the \$120 million that analysts in New Zealand said

Hong Kong Toll Compromise

HONG KONG - A consortium that will operate a new tunnel

under Hong Kong's harbor agreed with the government on Wednes-day to reduce its maximum profit from the project.

The Western Cross Harbor Tunnel consortium will get a maximum

16.5 percent return on its investment for the first three years of the

numel's operation, down from 18.5 percent agreed earlier. If toll receipts provide more money, it will be set aside to defray future increases. The initial toll is to be 30 Hong Kong dollars (\$3.69). An existing turnel that connects Hong Kong island to the Kowloon

The arrangement is a compromise with Hong Kong legislators,

Douglas Myers, the chief executive of Lion Nathan, said the company had made a bid for SA's breweries, but did not disclose the value of the offer. He said the share placement also raised capital to strengthen Lion Nathan's balance sheet.

A purchase at \$120 million could boost Lion's share price, which has been in the doldrums since the Bond Brewing purchase because the New Zealand concern was considered too highly leveraged.

Lion's shares, however, closed 10 New Zealand cents lower Wednesday, at 3,30 dol-

lars a share. Lion's shares stood at 4.80 "If the price is right, it has the potential to dollars a year ago.

Lion Nathan, New Zealand's largest brew-er, became a major competitor of Foster's in 1990 when it bought the Tooheys, Swan and XXXX brands from the crumbling Bond Brewing empire, formerly controlled by ty-

NL Starts With a Bang, Ends With a Whimper as AL Romps

Fun and Games, and a Sixth Straight

BALTIMORE — Major league traseball's 64th All-Star Game had its ragged edges, but it certainly

A whirlwind of an evening at Oriole Park at Camden Yards began with wild cheers for Baltimore shortstop Cal Ripken, weaved its way through some attention-grab-bing offense and memorably lighthearted moments, then ended with et another round of jeers at Toronto's Cito Gaston for the manager's failure to use hometown pitcher Mike Mussina in the last inning.

When it was over, the American League had continued its All-Star dominance of recent years with a 9-3 triumph over the National League in front of 48,147, the largest crowd ever to jam its way into this picturesque ballpark. Perhaps more importantly, the show lived up to its massive buildup. Things got started with a bang.

as this became the first All-Star Game ever to produce home runs in each of the first three innings. The NL grabbed a 2-0 lead in the top of the first when the Florida Marlins' Gary Sheffield became the first expansion-team player to hit an allstar homer, with a two-run shot against AL starter Mark Langston. But the AL responded with bases-empty blasts by Kirby Pucken off starter Terry Mulholland in the second and by Roberto Alomar off Andy Benes in the third, then never looked back.

Puckett, who entered the game without so much as an All-Star extra-base hit or RBI on his resume. added a run-scoring double in the AL's three-run fifth and was voted the most valuable player award. Albert Belle and Ken Griffey Jr. provided RBI singles in the fifth off losing pitcher John Burkett as the AL totaled seven runs in innings five, six and seven.

"h's something I never even hought about," Puckett, playing in his eighth all-star game, said of the MVP honors, "It feels real nice,

Mostly it was a good night for the much-maligned Toronto Blue Jays' all-star contingent, highlightof by Alomar's home run and Dev-on White's RBI double, It also was a good night for other hitters, who ned all-star records with seven doubles and 10 extra-base hits. The NL's Barry Bonds equaled the allstar mark with two doubles and Sheffield also had two hits.

Still, the AL won its sixth traight game, has captured seven of the last eight and eight of the third-longest winning streak in allstar history.

"Those guvs are powerhouses wer there," Bonds said, "and they're tearing us up right now."

It was not a good evening for the Atlanta Braves' all-star party, which had two errors, plus two run-scoring wild pitches by John Smoltz in the AL's three-run sixth. That prompted the crowd to begin a round of derisive "tomahawk chops."

The fans saved most of their displeasure, however, for Gaston, who sent his own Duane Ward to the mound in the top of the ninth rath-

Mussina, who warmed up in the

and Pat Hentgen of the Blue Jays likely would be held back for extra innings. He merely was getting in his regular between-starts work in

the bullpen, he said. Said Gaston, who already was unpopular among the locals for leaving Orioles Chris Hoiles and Gregg Olson off the team: "I guess I should just get out of town."

The night's quirks included a classic at-bat in which AL fast-ball pitcher Randy Johnson struck out Philadelphia first baseman John Kruk after throwing a ball to the backstop, and Texas catcher Ivan Rodriguez lodging a line drive in the left field fence. Jack McDowell. a pitcher for the Chicago White Sox. picked up the victory with just one inning and eight pitches of work.

This was Baltimore's first All-Star Game since 1958, and thus the first at new Camden Yards, Yet, at least in the early going, it looked as if it would be well worth the wait.

Neither starting pitcher exactly sparkled, Langston quickly got the AL in a hole when, with one out in the top of the first. Bonds ripped a double into the right field corner and Sheffield picked on a high fast-ball to pull a high fly just inside the left field foul pole for the night's first home run.

It didn't take the AL long to respond. In the bottom of the second, Puckett took a low fastball from Mulholland and hammered it over the fence in straightaway center field to make it a 2-1 game. An inning later. Alomar tied made it 2-

2 with his leadoff homer off Benes. Johnson provided perhaps the evening's best moment, in the top of the third. The 6-loot, 10-inch l-meter)left-hander with a fasthall that flies at 98 miles per hour (158 kilometers per hour) sent a pitch sailing well over Kruk's head. all the way to the backstop. That is enough to unnerve any bitter, and Kruk was no exception. He stepped distinctly toward first base on each of his next few swings, and Johnson left the mound grinning after striking him out on an almost-unfair

"The ball just got away." John-son said. "But John has the type of personality, I think, that he didn't think anything of it."

The other contender for best moment got the AL started in the bottom of the fifth. Rodriguez's fly ball to the alley in left-center field hit the wall-and stayed there, lodging itself between two pads for a ground-rule double. The AL proceeded to get three runs off Burkett

for a 5-2 edge. Alomar's ground ball got Rodriguez to third base, and he scored on Belle's single to right field. Belle kept going, hustling his way into second when David Justice fum-bled the ball for an error. Griffey got Belle home with a sharp single to right, and he reached second on Justice's off-target throw home. Burkett hit Cecil Fielder with a pitch, and Puckett's double to left-center scored Griffey from second.

It's been a subpar year for Puckett, at least by his lofty standards. His Minnesota Twins are founder-

bullpen while Ward pitched, said he was not upset because he had been told before the game that he beauting .198 at the break, certainly a respectable figure, but not daz-zling for him. Still, he knows how to perform when the spotlight is the

"A lot of people say I should not be here because my numbers are down. Puckett said. "But I went out and played hard every day."

The NL got within 5-3 in the top of the sixth on Bonds's second dou-ble of the game. Sheffield's ground-ball single and Barry Larkin's runscoring fly ball. But the NL unraveled in the bottom of the in-ning, when Smoltz tied an all-star record with his two wild pitches and the AL got three uncarned runs to boost its advantage to 8-3.

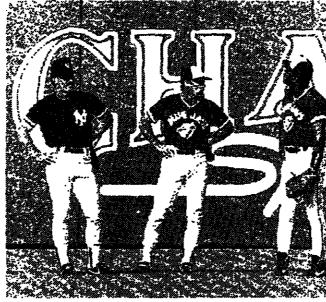

With two outs, shortstop Jeff Blauser committed the Atlanta contingent's second error of the contest when he muffed Carlos Baerga's roller. Steve Avery of the Braves then walked Belle and al-lowed White's RBI double before giving way to Smoltz. The right-hander wild-pitched Belle home on his first delivery.

The derisive "tomahawk chops followed, as Smoltz wild-pitched White home with the AL's eighth

Kirby Puckett, with his homer in the second inning, got the American League rolling and won himself the most valuable player award.

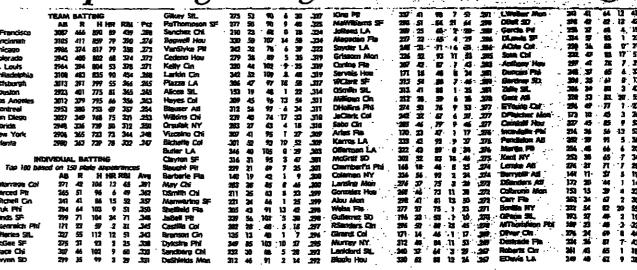

Joe Carter, in the outfield with Paul Molitor and Wade Boggs ing in last place in the AL West. before the game, must have wondered about the sign behind them.

"SPORTS BRITE

Indurain, in Alps, Puts Stamp on Tour

By Samuel Abt

l Herald Tribune SERRE CHEVALIER, France sage two days earlier when he easily i won a time trial, Miguel Indursin Frent it again Wednesday: He will be a hard man to beat in the Tour

The message might even read that, barring accident or sickness. he will be impossible to beat

The Spaniard, who has won the last two Tours de France while riding for the Banesto team, came in third Wednesday in a three man finish after the first of two daily stages in the Alps. He might have won the ge but, out of traditional courtesy by the overall leader, fell back in the sprint and allowed his two traveling

companions to fight it out.

The hitherto unlucky Tony Rominger, a Swiss with the CLAS team, took the victory over Alvaro Mejia, a Colombian with Motorola. They were timed in a rapid 5 hours, 28 minutes, 52 seconds, the same time as Indurain. Fourth and fifth. 1:13 behind, were Andy Hampsten an American with Motorola, and Zeuon Jaskula, a Pole with GB-MG. Nobody else was close.

Among the lesser losers was Erik Brenkink, a Dutchman with ONCE, who started the day in second place overall behind Indurain. He lost more than 31/2 minutes.

Bigger losers included such previously favored tiders as Alex Zulle, Gianni Bugno and Claudio Chiappucci. Zulle, a Swiss competing with ONCE, lost nearly seven minutes; Bugno, an Italian with Gatorade, lost nearly eight, and Chiappucci, an Italian with Carrera, lost nearly nine.

"Indurain is very strong." Rominger said, acknowledging the obvious. "I attacked him two or three times during the stage and each time he caught me."

When the 204-kilometer (126mile) run from Villard de Lans to Serre Chevalier was over, having crossed three major peaks in the Alps. Indurain stood far atop the 167 riders remaining of the 180 who started the bicycle race.

Second overall, 3:8 behind the

Spaniard, was Mejia. Jaskula (4:16) was third. Breukink (5:7) fourth. Rominger (5:44) fifth and Hamp-

This 80th Tour de France is exactly half over and Indurain must. cais Bernards, the Mottets—are be considered a huge favorite now, all at least 30 and past their best. He is strong and he is so small at least 30 and past their best of spectators sat hunched and bundled and bu

rivals to attack him in the Alps, he went on the offensive himself

"It was impossible to attack him -In case anybody missed the mes- on the Galibier because he was always with me," Rominger exed. He was discussing the third and final climb of the day, up the Galibier peak for nearly 18 kilometers at an average grade of 6.8 percent. The Galibier is rated beyoud category in length, toughness and steepness, and it was there that indurant struck, helped by an earlier attack by Ronninger that broke

apart the pack.
While the Swiss and the Spaniard set the pace on the climb, a group of five taxers - the first five finishers — began widening their lead over the shattered chasers. Near the top, Indurain suddenly accelerated leaving Hampsten and Jaskula behind.

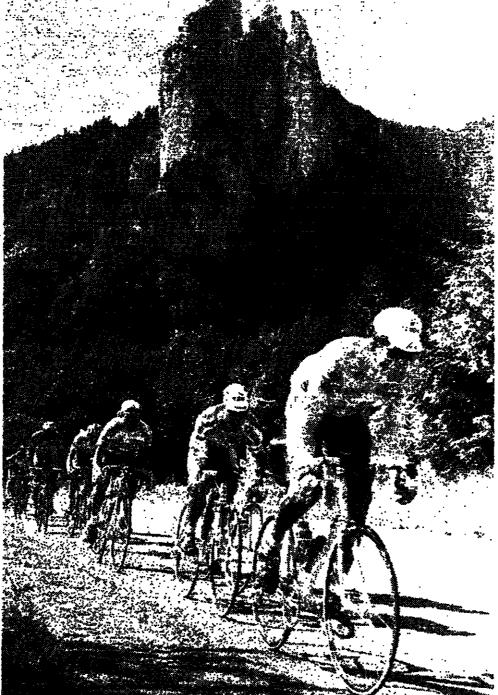

Rounger was first at the sun-mit, winning at 20,000-franc (\$3,650) prize, with Indurain sec-ond and 10,000 francs richer. Mejia won only applause from a huge crowd as he trailed them over.

Then the three tore along the 27kilometer descent to Serre Chevalier, often hitting speeds of 90 kilometers an hour and preventing

anybody else from making up time.
At an overall speed of 37 kph, the stage finished nearly 50 minutes ahead of the earliest predicted time in the Tour's official guide. That is the way the race has been going time in that is the way the race has been going time in that low I and these saids. since its start July 3 and there is no reason to suspect the pace will slack-en before the end in Paris on July 25. And so the French national day came and went like all the other days since the three-week race began: with almost no trace "de rance" in the Tour.

No rider for a team from the host country has been close to a victory so far and few French riders have shown their backs to the pack in even an aborted breakaway. The best French finisher Wednesday was Richard Virenque, in eighth place, 4:35 behind. The highest overall ranking for a French rider is

Daly Mail Comes Express

To the Awe of Sandwich

SANDWICH, England - Nick Faldo and Nick Price know each other as the favorites to win the 122d British Open this week. So do Payne Stewart and Bernhard Langer and, perhaps. Paul Azinger. The category helps shield them from

By Ian Thomsen

nal Herald Tribune

A category is also shared by the usual British contenders, who receive plenty of moral support. There is a category for former champions, always directly opposed by the potential champions. One side cannot win without limiting the other. There are a lot of other categories for players not worth mentioning, but at least they have a secure place to store their

And then there is John Daly, He is alone in his category. He invented his category. Everyone else need not look far

to find solace or strength of rivalry. John Daly has no such community. How and where will he fit into the world's oldest major golf tourna-ment beginning Thursday? It is like trying to find room at the zoo for King Kong.

He arrived Tuesday on the private jet of Jack Nicklaus, with whom Daly is compared, ludicrously. Later they stood in southwest England on famous Royal St. George's, overlooking Sandwich Bay from the tee of the fifth hole, a 421-yard (385-meter) dogleg. Daly asked, "What do I hit here." Nicklaus said, "Well, you play an iron out here somewhere, and

then you pitch it in. Daly said, the way kids do staring up at rollercoasters. "I want to hit a driver."

Here one can imagine the Nick-laus shrug, the blank accompanying frown, as he tried to explain that no one had ever tried such a thing, that no one could even say where the green was, so how can you aim for a target without knowwhere it is?

But by then Daly had already unsheathed his driver of its cover, a shaggy red and white Arkansas Razorback puppet with two white fangs. Swinging all the way around. as if trying to scratch his back where he ... can't ... quite ... reach, he sent three drives away. each over its own distant hill. Two players had been on the green, like South Dakota farmers when the meteorites fall out of the sky. One of these lipped out of the cup.

Daly believes this course offers him more opportunities to overwhelm the imagination than did Muirfield last year, where he finished last at 14 over par in his

British Open debut. "If the wind blows real hard, there's no telling what I'm going to do," he said. "I definitely wouldn't put myself as the favorite to win. The European guys definitely have

Graf Is Expected To Play in Cup

The Associated Press

FRANKFURT - Steffi Graf is likely to play for the Federation Cup's defending champion. Germany, which Wednesday drew Australia as its first-round opponent in the week-long women's team tennis competition that starts Monday.

Graf, who returned this week from a vacation in the Caribbean. has had a foot injury for weeks. Despite it, she won both the French Open and Wimbledon titles.

Graf, who has regained the No. ! ranking in the world following the stabbing of Monica Seles, was told by her doctor last week that she should rest for several weeks.

But the Cup's director, Christian Thiemann said Wednesday that "I am sure that she will play."

The newspaper Bild Zeitung quoted Graf's father, Peter, as saying the foot injury was healing well. Top-seeded Spain, which lost to Germany in last year's final, will play Britain in the first round of the 32-nation tournament. The United States, seeded sixth, faces Canada,

Landing Gate Blues

not flying their planes but parking

Coming into Dallas the other day the pilot proudly announced that we were 15 minutes early. Twenty minutes later we were

still sitting on the tarmac. The cap-

"Folks, there seems to be a little congestion at our gates. Two pilots are having a fist fight about whose parking slot it is, so we'll

just sit out here and look at the sea gulls until we

Buchwald An hour later he announces, There still seems to be some confusion about which gate we are going to. We were originally assigned G-7, but apparently that one is reter 11. So the tower told us to go to B-54 and hold there until A-3 was available. So that's what we'll do. The flight attendants will pass out playing cards if anyone wants to

Three hours later he says. "We're still waiting for the 106 flight for Buffalo to leave, and when it does we'll be off and running, In the meantime, I am asking passengers to go easy on the drinking water. I have been informed by the cabin

enjoy a game of gin rummy."

Buyers Few for Hats Of Maxwell's Widow

LONDON -- Forty-five hats worn by Betty Maxwell, the widow of media baron Robert Maxwell, went up for sale at Christie's auc-

But the creations by London and lip Somerville, lan Thomas, Rudolf and Madame Fausta failed to sell except for two of 12 lots bought for less than £200 (\$300). The couple's belongings are being auctioned off to satisfy creditors of Maxwell's

EW YORK — The airlines crew that there is only one cup per are having a bit of trouble — person left. The people sitting next to the emergency exits are requestthem. The fact that you land at ed not to try to leap out of the plane your destination is no guarantee via those doors because they will that you will be allowed to disem-bark. Still have to wait for their luggage. The sun started to set on the field as our plane taxled to a weather

station five miles away. Now the co-pilot spoke. "First, on behalf of myself and the entire crew, we'd like to thank you for using Planet Airlines. The good news is that we're safe and sound. which is a blessing considering how many near misses there are in the

sky these days. "The bad news is that even these few planes on the ground can cause gridlock. I know many of you are concerned that you might miss your connections in Dallas. Don't let it bother you. I had an uncle who told me once, 'My boy, if you miss one plane, another one will always come along.' He spent most of his life at Chicago's O'Hare airport and passed away quietly in his sleep at Gate F-19.

But that isn't what I want to say. Many of you are wondering when you can get off the plane. I could tell you in three hours or a month, but none of us in the flying business has any idea any more about what's up and what's down. When we last taxied by the terminai there was a large sign that said Full Up. So let's make the most of it. In answer to your question as to whether you could eat vesterday's airline food, our medical adviser says that it's not a great idea."

I had a feeling that we were about to have a mutiny, with the passengers taking over the plane and sliding down the emergency

Suddenly the pilot came on the air, "Folks, your patience has been rewarded. We've been assigned Gate A-3 which is probably the most sought-after parking slot at the Dallas airport. It's been completely redecorated, and every airline hopes and prays to get in it.

"I want to thank you for flying Planet Airlines, and I hope that the next time you travel you remember us. By the way, you have all been awarded 5,000 frequent-flyer miles for the time you spent overlooking the bird sanctuary at the end of the

Into the Sunrise With the Dirty Dozen

By Mike Zwerin
International Herald Tribune

M ONTREAL — The Dirty Dozen
Brass Band grew out of a tradition
described by the old saving which goes that "if a fly flies crooked in New Orleans, somebody will follow it with a parade."

Jazz will celebrate its centennial anniversary at the end of the decade. It began with the New Orleans brass marching bands like the Tuxedo and the Olympia, and with Jelly Roll Morton, who said that he invented jazz and whose music the DDBB interprets on their latest Columbia album.

The Dirty Dozen Brass Band is neither dirty, a brass band, nor 12 people. Two trumpets, two saxophones, a trombone, a sousaphone (a sort of unwound tuba) and two guys banging drums rapidly, they are as much influenced by The Neville Brothers. with whom they have worked, as Louis Armstrong They have recorded with Elvis Costello and Manhattan Transfer.

Nevertheless hailed for having revived the brass band tradition in 1978, their name comes from the Dirty Dozen Social and Pleasure Club of which a founder's father was a member. Social and Pleasure clubs throw pictucs for birthdays and weddings. raise money for charity and parade for funerals. Sometimes they parade just for the

It is more than likely that as you read this the DDBB will be riding, not marching, into one more in a long series of European sunrises. And just about now, as I write it, co-founder and leader Gregory Davis is discussing accident insurance with the Avis car rental agency in Buffalo, New York. If this is success in the jazz business, and it is, let's not even consider failure.

Trumpeter Davis admits to having all the work he can handle. His mortgage is almost paid up, and he owns rental property in New Orleans, Being black, 36, and a jazz musician, this might be considered the American Dream come true. The organization he directs has played stadium concerts with the Grateful Dead. It is well regarded and brings pleasure to audiences all over the world (they just concluded three sold-out weeks in Japan). Why then is this man

For one thing, he does not have what might be called a fulfilling family life. Always catching planes, trains, driving on tumpike and passing the better part of his life in hotel rooms, he has to refuse work six months ahead if he wants to see his wife and young children on Christmas or the Fourth of July. In times of recession, this may seem like a blessing, but the work is about as hard

Gregory Davis (right) leads the Dirty Dozen Brass Band in Montreal.

Even an off-day means traveling to the next job. For short hops, they rent minivans, which they drive themselves. They sell their own records and T-shirts, collect their own money, book their own transportation and hotel accommodations. Where are all the roadies, drivers, concessionaires and personal managers? As the old saying goes, "Romance without finance is a nuisance."

The way Davis sees the problem is that "we fall between the cracks." Not knowing how to deal with a real original, he says Columbia does not get products in the right bins of the right stores at the right time. They're too busy dealing with Michael Jackson, Nothing less than seven Tigures interests them. However, it's also deeper than that. The problem lies in the basic nature of the beast.

The DDBB puts on a more ambitious show than most jazz groups, which cuts two ways. Their attractive, energetic, communi-

cative stage presence is difficult to translate to recordings. They must be seen to be believed. So they work for their money. their money will not work for them. Their

tractive, eclectic and delightful gumbo.

This is a deep crack indeed. We've taken a lot of criticism," says Davis, "Because we're not 'pure' enough. But we never had any intention of being only a New Orleans brass band. We listen to Ray Charles, 100. Even Louis Armstrong didn't play 'When The Saints Go Marching In' every night

music combines R&B, jazz, funk and even

country elements with Cajum and New Orleans brass band tradition into an at-

But the DDBB has had no "Hello Dolly." They sell in five figures, they pull crowds in four. What sensible modern executive wants to bother with such small change? The best agent Davis ever had could afford to work for the love of the band because he had already made his

fortune from Stevie Wonder and Spyro So they carry boxes of their albums to sell after gigs. There are always problems with customs agents. They flew from New Or-leans into Buffalo, checked 600 copies of "Jelly Roll" in a locker at the airport and rented two mini-vens to drive to Montreal. A swerving motorcyclist caused the two vans to collide on the Peace Bridge. Nothing serious except for the anguish and a late arrival in Montreal Returning to Bulfalo. they took the damaged vans, picked up the product from the locker and took it to their next engagement in Racine. Wisconsin. The following day they flew to The Hague in the Netherlands. Do you believe this itimerary?

Somebody is throwing darks at a map. The illogic continues. Davis says Columbia only shipped 50 copies of the "Jelly Roll" album to the Netherlands. No pro-motion copies to journalists and radio stations, 50 copies to the shops. The last time the DDBB played Holland, Davis sold 200 copies of an earlier album after one gig alone. He knows the marker's there. The more he talks, the more bitter he becomes.

Entering the EC, he will have to deal with other customs agents, rent more mini-vans. This is all in addition to playing music five or six nights a week. Their music is difficult and exhausting, they blow long and hard. The DDBB has opened for Los Lobos, which travels in two buses and three equipment trucks and books hotel rooms in every city even if it means checking in at 2 A. M. and leaving four hours later. On the other hand, the ODBB often drives directly to the hotel in the next town, gets a full day's sleep and then a full night's sleep after the gig, two sleeps for the price of one. This is another old tradition in the glorious history. of jazz, it's called a twofer.

The resolution of the problem lies in drawing enough new fans so that the name rather than their physical presence will eventually make money. It's called royalties and is what this business is really about. You don't want to drive mini-vans into sumrises into your old age.

Davis sums it up: "I'm comfortable coilecting the money and taking care of the accommodations and the transportation. If something goes wrong, I can only blame myself. Driving ourselves keep our heads on straight. The guys won't go out drinking and dancing if they know we have to leave after the gig. It gets us to the next place on time. The only aspect I have no control over is record distribution; that's the company's job, and they're not doing it."

A few days after I spoke to Davis, Co-lumbia Records decided not to pick up the option on the Dirty Dozen Brass Band

Heidi Toffler Wants Her Share of Future

Mts. Future Shock: Heidl Toffler, 63. says she never wanted credit on the cover of her husband Alvin's future-prodicting books, even though she had done half of the work. But pressure from feminists and mismderstanding from men who implied "that I wasn't doing any work" finally pushed her "over the edge." The next Tollier effort - "War and Anti-war," due out in October - will have her name out there, too.

Jon Evans seems to have a knack for landing on her feet. Five months after her most recent job, as publisher of Turtle Bay Books, was terminated when the imprint was dissolved by Random House, she moves to the William Morris Agency as a literary agent.

Michael Jackson's Hong Kong fans may be justiliably uneasy these days. Ticket sales to his planned concerts there have been suspended amid fears that the pop singer may delay the start of his "Dangerous" world tour. The tour was to have begun in Hong Kong on Aug. 15 and 16.

Joan Collins recently turned 60, but the former "Dynasty" schemer isn't worried. She told New Choices magazine her goal is "to be living proof that women can be sery and desirable as they get old-er. The magazine quotes Catherine Denerve as saying: "When I turned 30, people predicted my career is over. At 40, the same prediction was made. Now in my 50th year, I have mixed feelings . . But luckily, European women are valued more than American women as they get older."

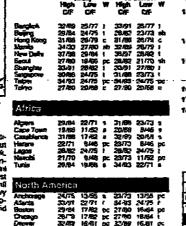

Monty Norman, who wrote the theme time for the James Bond films, won an apology and damages in a London court from the British music magazine VOX, which car-ried a reader's letter saying it was someone else's work. Norman's lawyers said the claim had distressed and embarrassed him. Libel damages were not disclosed.
